

UNFPA GREEN PROCUREMENT

UNFPA GREEN PROCUREMENT

The product with the highest environmental impact in the UNFPA supply chain is the male latex condom.

It is also a product for which UNFPA is working to reduce the environmental impact.

UNFPA has established measurable goals and engaged with condom suppliers to develop action plans to respond to UNFPA's environmental goals.

Today, all male and female condom suppliers holding a long-term agreement with UNFPA are ISO 14001 certified for environmental management.

2021

7

Million kWh of electricity saved

13

Thousand metric tonnes of non-emitted CO₂e

235

Thousand kilos of solid waste reduction

60% Recycled post-consumer materials in outer boxes and shipping materials

100 % of condoms packed in FSC certified cardboard boxes or equivalent

1.4

Million m³ of water treated and 1.2 million m³ of water saved
