UNFPA Evaluation Quality Assessment Grid

Version: May 2024

REPORT RATING SUMMARY			
Overall Ra	Overall Rating		#REF!
••••	Excellent	5	
••••	Highly Satisfactory	4	The report fully meets all UNFPA/UNEG standards for evaluation reports, with minor shortcomings in certain indicators. Decision makers may use the evaluation with a high degree of confidence.
• • • -	Satisfactory	3	
• •	Fair	2	
•	Unsatisfactory	1	

REPORT DETAILS				
Title of the evaluation report	Formative evaluation of the UNFPA Strategic Plan 2022-2025			
Region				
Country	Global			
Year of report	2024			
Business Unit/programme country (managing evaluation)	Independent Evaluation Office (IEO)			
Date of assessment review (dd/mmm/yyyy)	November 7, 2024			
Name of assessment review firm	IOD PARC			
CLASSIFICATION OF EVALUATION REPORT				
Primary SDG(s) covered (list provided below)	3, 4, 5 and others			
UNFPA Strategic Plan areas covered (lists provided below)				
Three transformative results	All three			
Six outputs	All six			
Six accelerators	All six			
Organizational effectiveness and efficiency	Yes			
Humanitarian evaluation	No			
Evaluation evaluand (e.g. country programme/intervention/policy/thematic area)	Strategy			
Evaluation type (e.g. formative, summative, developmental)	Formative			
Geographic scope (e.g. global, regional, national)	Global			
EQA Summary: The rater will provide top line issues for this evaluation relevant for feedback to senior management (strengths and weaknesses), summarizing how the evaluation report meets or fails to meet all criteria. As relevant, the rater will highlight				
good gractice/added value elements and the level of complexity of the evaluation. The rater should also highlight how cross-cutting issues were addressed in the report. Considerations of significant constraints (e.g., humanitarian crisis or political turmoil)				

hould also be highlighted here.

his is a highly satisfactory evaluation report, with minor adjustments it would be an excellent report. A summary of the key strengths and areas for improvement are provided below.

Transmits a larger status region with minimal signatures its wadure are statement report. As summinary or the sex systems of the control of t

ations and conclusion. Each recommendation includes a series of suggested actions. The targeted responsible using (lead and additional units) are identified against each suggested actions

Areas for improvement

Assat for improvement

Section A: Executive Summary - While there are several strengths with the way the Executive Summary is written and presented, it exceeds the page limit specified in the ToRs by 2 pages.

Section B: Background - There is limited information identifying stakeholders in he main report. However, there is a stakeholder map provided in the Annex of the inception Report. The mapping lists the stakeholders involved at global, regional and country level with corresponding columns that outline their general responsibilities and role and interests in the Strategic Plan. This lays the groundown's for the sampling strategy and evaluations are encouraged to include it in the Annex of the main report.

Section D: Evaluation Design and Methodology - The Evaluation Report does not refer to a sampling strategy however, there is some components of the sampling in the Annex of the Main Report and the inception Report, such as for the country case selection and the sampling for the selection of deep dives. To enhance transparency, it would be beneficial for evaluators to describe the strategy for selecting informants. The data collection instruments are not included in the Annex of the Main Report and the inception Report, such as for the country case selection and the sampling for the selection of deep dives. To enhance transparency, it would be beneficial for evaluators to describe the strategy for selecting informants. Evaluators could consider incorporating an assessment of the evidence strength used in the analysis. However, this is not a requirement under the evaluation criteria and therefore does not affect the scoring. This sughts in some components of the sampling of the person Report and the inception Report, such as for the country case selection and the sampling for the selection of deep dives. To enhance the transparency, it would be beneficial for evaluators to describe the strategy for selecting informants. Evaluators could consider incorporating an assessment of the evidence strength used in t

	or future evaluators: The rater will identify key suggestions to improve the tions		Recommendations				
ECTION R							
ECTION A:	EXECUTIVE SUMMARY (weight 5%)	#REF!	Comments on Rating				
uestion 1.	Can the executive summary inform decision-making?						
ı	Is a clear, standalone document useful for informing decision making, (a minimum of 5 pages, up to a maximum of 7 pages). Note: YES - the executive summary is within the indicated maximum page limit. PARTIAL - the executive summary exceeds the maximum page limit by 1 to 2 pages. No - the executive summary exceeds the maximum page limit by to 2 pages. No - the executive summary exceeds the maximum page limit by more than 2 pages.	Partially	The Executive Summary is clearly written and well-presented. It provides useful information for decision-making. Unfortunately, It only slightly exceeds the page limit (by 2.5 lines) with list over 7 pages long. This could easily be addressed by formatting as there is a space on gp. of the Eventure Summar to absorb additional rows. However, the ToR suggests a page limit of 5 pages (see Annex 5 of the ToRs). For this reason, it is rated as 'partial'. In order meet this criterion, reducing the length of the main findings section, which currently spans 2.5 pages. One option for this is to present the 'overall response' for each evaluation question in the findings section. Evaluators can also consider reducing the length of the conclusions section.				
i	Includes all necessary components of the evaluation report, including: (1) overview of the context and intervention, (2) evaluation purpose, objectives and intended users, 3) scope and evaluation methodology, (4) summary of most significant findings, (5) main conclusions and (6) key recommendations	Yes	It includes all the necessary components of the evaluation report. This includes the an overview of the context (para 1-4), the evaluation purpose, objectives and intended users (para 5-8), scope of the evaluation and methodology (para 9-11), summary of the main findings (para 12-29), main conclusions (para 30-44), and key recommendations (pxiv-p.xv).				
II	Includes all significant information in a concise yet clear manner to understand the theme, intervention, programme, project and the evaluation.	Yes	As mentioned in Q1i, the Executive Summary is very well written, incorporating key information in a concise manner but incorporates sufficient detail tunderstand the background, purpose of the evaluation, the key findings and conclusion.				
ECTION B:	BACKGROUND (weight 5%)	#REF!	Comments on Rating				
uestion 2.	Is the evaluand (i.e. intervention/policy/thematic area etc. that is to be evaluated) and context of the evaluation clearly described?						
geographic coverage, implementation period, main par cost/budget, and implementation status. II Clear description of the context of the evaluand (e.g. e and political context, relevant aspects of UNFPA's instit normative and strategic framework, cross cutting issue gender equality and human rights, labality and NLOSA.	I Clear description of the evaluand (e.g. intervention), including: geographic coverage, implementation period, main partners, cost/budget, and implementation status.	Yes	The Evaluation Report provides a clear description of the UNFPA's strategic plan. This includes an overview of strategic planing including alignment global frameworks, integrated results and resources framework, business model and the UNFPA global programme and six regional programmes (section 2.1). It also provides a description of the UNFPA Strategic Plan 2022-2025, relevant for this evaluation (section 2.2) cit clearly describes the six accelerators and the strategic shifts. In addition, Annex 3 elaborates further on the Strategic Plans. The implementation period and cost is provided under Section 2.1, which describe the current strategic plan including the other two Strategic plan leading to 2030. This is well depicted in figure 1. The goegraphic coverage is global including regional and country (para 21). There is a brief description of the integrated budget (para 22). There are no references to partners in the background of the report as this is largely internally focused.				
		Partially	As mentioned above in Q2], there is a clear description of the Strategic Planning, Some of the information presented, such as alignment with SDGs, global frameworks and the strategic plans, provide contextual information, in addition, given this evaluation is [Sobolar in scope, effects with some planning of contextual information typically found in programmatic evaluation is not possible. Nevertheless, while the Evaluation Report provides a clear description of the Strategic Plan, it could benefit from asking a step back to elaborate on the factors driving the need for the accelerates and strategic shifts. While there is a brief mention on para 24 to 'recognizing the setboots resulting from recent global events,' it would be helpful if evaluators elaborated on these further and the challenges they aim to overcome, for this criterion to be met.				
III	i Linkages drawn between the evaluand and the ICPD benchmarks and SDGs relevant targets and indicators.	Yes	There are clear linkages drawn between the Strategic Plan and the ICPD Programme of Action (see para 18 on alignment) and the SDGs (para 17).				
estion 3.	Are key stakeholders clearly identified and analysed?						
	I Clear identification of key stakeholders which should include implementing partner(s), development partners, rights holders, and duty bearers among others; and of linkages between them (e.g., stakeholder map).	Yes	There is a section that identifies the primary audiences for the report (para 9), which are mainly from UNFPA. A stakeholder map is provided in the Annex of the Inception Report (Annex 5). Evaluators can consider including the stakeholder map in the Annex of the main report.				
-	I Stakeholders are analysed to understand their specific rights, duties, needs, interests, concerns, and potential impact on the evaluand.	Yes	As mentioned above, there is limited information on stakeholders in the main report. However, Annex 5 of the inception report provides a fairly comprehensive stakeholder mapping. The mapping is presented in the form of a table, which lists the stakeholders involved at global regional and country level. It also includes corresponding columns outlining general responsibilities within UNFPA as well as their role and interest in the Strategic Plan. Evaluators are encouraged to include these tables in the Annex of the main report, which can be signosted in the main report. It provides a good description of the key stakeholders, relevant to this evaluation, and helps set the foundation for a sampling strategy.				
ECTION C:	EVALUATION PURPOSE, OBJECTIVES AND SCOPE (weight 5%)	#REF!	Comments on Rating				
uestion 4.	Is the purpose of the evaluation clearly described?						
	Purpose of evaluation is clearly defined, including why it was needed at that point in time, its intended use, and key intended users.	Yes	The purpose of the evaluation is clearly defined on p.2 (para 7-8). It explains why it was needed at this point in time and its intended use i.e. to 'provid evidence what works (and what does not) to occelerate progress and inform the design of the strategic plan for 2026-2029' (p.2). The key intended uses a read from in para 9. The list is slightly longer and more specific than what is presented in the ToRs.				

	Clear and complete description of the objectives of the evaluation, including reference to any changes made to the objectives included in the ToR (if applicable).	Yes	There is a clear description of the objectives of the evaluation provided in para 10. No changes have been made to the objectives from those provided in the ToRs.
	Clear and relevant description of the scope (e.g. thematic, geographic, and temporal) of the evaluation, covering what will and will not be covered, as well as, if applicable, the reasons for this scope (e.g., specifications by the Tools, lack of access to particular geographic areas for political, humanitarian or safety reasons at the time of the evaluation, lack of data/evidence on particular elements of the intervention.	Yes	The scope of the evaluation is described in para 11. It includes the temporal scope, the elements introduced in the Strategic Plan such as six accelerator and 12 strategic shifts, and the geographic scope i.e. UNFPA's work at global, regional and country levels. It does not state if there are any components that will not be covered.
ECTION D: Juestion 6.	EVALUATION DESIGN AND METHODOLOGY (weight 20%) Are the selected evaluation questions and evaluation criteria appropriate for the purpose of the evaluation and is there clear justification for their use? Note: UNFPA evaluation standards refer to the OECD/DAC criteria such as: relevance, coherence, effectiveness, efficiency and sustainability fort necessarily applicable to all evaluations) and, for country programmes that include circumscribed and limited humanitarian analyce mergency interventions, the criteria of coverage and connectedness.	#REF!	Comments on Rating
i	Evaluation questions and sub-questions are appropriate for meeting the objectives and purpose of the evaluation. The relevant criteria are specified and are aligned with the questions.	Partially	The evaluation questions are relevant and appropriate for meeting the objectives and purpose of the evaluation [p.3]. The evaluations made adjustment to the evaluation questions during the innegration period by identifying the main questions against four lever areas "scientaries," starting; inflirt, "enablers," and "forward-looking perspective." They evaluation team had developed an analytical framework and the questions were adjusted accountries is elaborated on in Annex 4 of the main report and in the inception Report. The OED DAC criteria are no longer specified against the questions, as presented in the ToR. As the questions cut across several OECD DAC criteria [p.6 of ToR], this may be why they are not presented. It would be helpful if evaluations provided a rationale or justification for not specifying the relevant criteria in order to fully meet this criterion.
i	Evaluation matrix clearly presents the evaluation criteria used as well as the corresponding evaluation questions, indicators, lines of inquiry, benchmarks, assumptions, source of data, methods for data collection and analysis, and/or other processes from which the analysis can be based, and conclusions drawn.	Yes	The evaluation matrix is clearly presented. As mentioned above, the OECD DAC criteria are not used. However, the evaluation matrix includes assessme indicators, identifies main lines of inquiry, and sources, methods and tools for each evaluation sub-question. The indicators and lines of inquiry provide basis for analysis from which conclusions can be drawn.
uestion 7.	Is the theory of change, results chain, logical framework, or equivalent framework well-articulated?		
1	Clear description of the intervention's intended results, or of the parts of the results chain that are applicable to, or are being tested by, the evaluation.	Not Rated	As this is a formative evaluation, it looks specifically at the use of new elements introduced in the current Strategic Plan (i.e. the six accelerators and strategic shifts) to assess "organizationonal readness and strategic position to accelerate the progress vourable that cohievement of the 37Rs and catalyze discussion on the design of the next strategic plan given the state of progress on the SDGs" (pars 11 on evaluation objectives). It explains in para 31 that the "evaluation did not assess this contribution nor use a theory of change that tested the associated assumptions in a model. Rather, it was based on the macro-level assumption that the strategic and programmatic shifts would result in an increased contribution by UNFPA while recognizing that some may be more relevant than others."
ı	Causal relationships between the various elements (e.g. outcomes, including the three or relevant Transformative Results, outputs) of the theory of change, results chain or logical framework are presented in narrative and/or graphic form).	Not Rated	As mentioned above in 7i, this evaluation is formative to assess organisational readiness and strategic position.
"	Comprehensive analysis and assessment of the theory of change, results chain or logical framework, and if requested in the ToR, it is retrofitted/reconstructed by the evaluators.	Not Rated	As mentioned above in 7i, this evaluation is formative to assess organisational readiness and strategic position.
uestion 8.	Does the report specify adequate methods for data collection, analysis, and sampling?		
	Evaluation design and set of methods are clearly described, and are relevant and nobust for the evaluation's purpose, objectives and scope, including the use of AI in the evaluation process if applicable.	Yes	The evaluation design and methods are clearly described. The Evaluation Report provides an overall approach to the evaluation. They are relevant and robust for meeting the evaluation's purpose, objectives and scope. What is every helpful is the manifycal framework (section 3.2), deeped by the evaluation team, to provide a way to better understand and assess the accelerators and strategic shifts. The analytical framework The Evaluation Matrix is quiet thorough, providing the assessment indicators and interest for analysing data. The design also builds on the findings from the evaluation that an evaluation of the evaluation of the evaluation of the evaluation process in the evaluation of t
i	Data sources are all clearly described and are relevant and robust; these would normally include qualitative and quantitative sources (unless otherwise specified in the ToR).	Yes	The data sources are clearly described in Section 3.3. It includes a table with the types of data sources including review of over 100 documents, includin qualitative and quantitative data (Annex 6 includes the full list), key informants interviews with 60 stakeholders (Annex 8 includes the full list), five subject deep dives, 12 country-level studies, and findings from six regional programme evaluations that were being conducted at the same time.
II	Sampling strategy is provided - it should include a description of how diverse perspectives are captured (or if not, provide reasons for this).	Partially	The main report does not reference a sampling strategy. Annex 4 provides detail on the data collection process. However, information on sampling for key informants is limited. Para 42 of Annex 4 states that "interviewees were identified in the process of stakeholder mapping (see Annex 5)." However Annex 5 appears to be the Evaluation Matrix, suggesting that the reference might have been intended for the inception Report. Annex 5 of the inception Report contains a stakeholder mapping, but it does not outline a sampling strategy or specify the criteria or process used to identify key informants, including measurest baken to ensure diverse perspectives. For greater transparency, it would be beneficial for evaluators to describe trategy for selecting informants. Nevertheless, additional information on the selection of deep divers is available in Annex 10 of the inception Report, and the criter for selecting country-level studies are clearly outlined in both Annex 4 of the Evaluation Report and Annex 10 of the inception Report, and the criter for selecting country-level studies are clearly outlined in both Annex 4 of the Evaluation Report and Annex 10 of the inception Report. To strengthen this criterion, evaluators are encouraged to include a brief description of the sampling strategy in the main report, with references to the Annex for additional details, as necessary. It is important to describe the process used for selecting key informants, as well as how diverse perspective were considered. Evaluations might also consider including the selection process for deep deve within the Annex for the main report, of the main report of the main re
			Inception Report.
iv	Methods allow for rigorous testing of the theory of change, results chain or logical framework (e.g. methods help to understand the causal connections, if any, between outputs and expected outcomes (STRS).	Not Rated	
v	chain or logical framework (e.g. methods help to understand the causal connections, if any, between outputs and expected outcomes (31Rs). Clear and complete description of the methods of analysis, including explainability and full disclosure of the use of Al in the evaluation process, if applicable.	Not Rated Yes	Inception Report. As mentioned above in 7i, this evaluation is formative to assess organisational readiness and strategic position. There is a clear description of the method of analysis in Section 3.4. This includes the use of the evaluation matrix as the framework for analysis and synthesis of data. It describes the use of the indicators and process of triangulation. The sub-questions were used as unit of analysis to develop finding it also explains how different contents were analysed to identify patterns and findings, as appropriate. The use of Al in the evaluation is elaborated on Annex 4 (Section 6.5). It explains how Al model was trained, what checks were in place, as well as the limitations.

Clear and complete description of limitations and constraints faced by the evaluation in its data collection and analysis, including gaps in the evidence that was generated and mitigation of bias, and how these were addressed by the evaluation (as feasible). Are ethical issues and considerations described? The evaluation should be guided by the UNEG ethical standards for the evaluation should be guided by the UNEG ethical standards for	Yes	Inception Report. As mentioned above in 71, this evaluation is formative to assess organisational readiness and strategic position. There is a clear description of the method of analysis in Section 3.4. This includes the use of the evaluation matrix as the framework for analysis and synthesis of data. It describes the use of the indicators and process of triangulation. The sub-questions were used as unit of analysis to develop finding it also explains how different contexts were analysed to identify patterns and findings, as appropriate. The use of AI in the evaluation is elaborated on Annex 4 (Section 6.5). It explains how AI model was trained, what checks were in place, as well as the limitations. There is a clear description of the limitations and constraints faced by the evaluation team as well as the mitigating steps on p11 (Section 3.5) of the main report. The gaps in evidence are discussed in relation to the Regional Programme Evaluations (RPE) that ran concurrently with the SPEs as not all the reports were ready during the data synthesis phase. The main report explicitly refers to adhering to UNEG's Norms and Standards for Evaluation and that it abides by UNEG Ethical Guidelines and Code or Conduct. It also refers to the team's adherence to UNEG's gender-related norms and standards. It describes doing so by "incorporating a systematic principles" and the proporation that enables are discussed in organization of the proporation of the with UNEPA's crossing principles.
v	chain or logical framework (e.g. methods help to understand the causal connections, if any, between outputs and expected outcomes (3TRS). Glear and complete description of the methods of analysis, including explainability and full disclosure of the use of Al in the evaluation process, if applicable. Clear and complete description of limitations and constraints faced by the evaluation in its data collection and analysis, including gaps in the evidence that was generated and mitigation of bias, and how these were addressed by the evaluation as (as feasible). Are ethical issues and considerations described? The evaluation is out, the evaluation report should include: Explicit and contextualized reference to the UNEG obligations of evaluation. As such, the evaluation (scriptics of evaluations described):	Yes	As mentioned above in 7i, this evaluation is formative to assess organisational readiness and strategic position. There is a clear description of the method of analysis in Section 3.4. This includes the use of the evaluation matrix as the framework for analysis and synthesis of data. It describes the use of the indicators and process of triangulation. The sub-questions were used as unit of analysis to develop finding It also explains how different contexts were analysed to identify patterns and findings, as appropriate. The use of Al in the evaluation is elaborated on Annex 4 (Section 5.5). It explains how Al model was trained, what check user in place, as well as the limitations. There is a clear description of the limitations and constraints faced by the evaluation team as well as the mitigating steps on p11 (Section 3.5) of the main report. The gaps in evidence are discussed in relation to the Regional Programme Evaluations (RPE) that ran concurrently with the SPEs as not all the reports were ready during the data synthesis phase. The main report explicitly refers to adhering to UNEG's Norms and Standards for Evaluation and that it abides by UNEG Ethical Guidelines and Code of Conduct. It also refers to the team's adherence to UNEG's gender-related norms and standards. It describes doing so by Tincorporating a systematic approach to the onalysis' and It included a deep dive on gender and social norms. It also outlines its alignment with UNEPA's cross-cutting principles such as disability inclusion, leaving no one behind and social and environmental standards. These references are found in Section 3.1. However, there is lack of contextualization, describing how the norms and standards were used in the evaluation. This report would benefit form additional details on extendal considerations. Whell it makes references to several ethical guidelines and principles in 91 above, it lacks detail on specific areas such as confidentiality and data protection. Including data collection protocols in the Annex would a
vipuestion 9.	chain or logical framework (e.g. methods help to understand the causal connections, if any, between outputs and expected outcomes (31Rs). Glear and complete description of limitations and constraints faced by the evaluation in its data collection and analysis, including gaps in the evidence that was generated and mitigation of bias, and how these were addressed by the evaluators (is feasible). Are ethical issues and considerations described? The evaluation should be guided by the UNEG ethical standards for evaluation. As such, the evaluation report should include: Explicit and contextualized reference to the UNEG obligations of evaluation. As such, the evaluation report should include: Explicit and contextualized reference to the UNEG obligations of evaluations. As each, the evaluation report should include: Clear description of ethical issues and considerations (e.g. respect for dignity and diversity, fair representation, confidentiality, and avoidance of harm) that may a vise in the evaluation, safeguard mechanisms for respondents (e.g. parental consent forms for adolescents, compliance with codes for vulnerable groups, WHO standards of safe data collection on GBV) and ethical considerations in the use of Al as applicable (e.g. transparency) of use, explainability, privacy, data protection, accuracy, human rights). If Al is used in the evaluation, there should be transparency and disclosure on the ethical and responsible use of Al in the report. Does the evaluation interes innovative practice that adds value	Yes Yes Partially	As mentioned above in 7i, this evaluation is formative to assess organisational readiness and strategic position. There is a clear description of the method of analysis in Section 3.4. This includes the use of the evaluation matrix as the framework for analysis and synthesis of data. It describes the use of the indicators and process of triangulation. The sub-questions were used as unit of analysis to develop finding it also explains how different contexts were analysed to identify patterns and findings, as appropriate. The use of AI in the evaluation is elaborated on Annex 4 (Section 5.5). It explains how 4 model was trained, what check use rin place, as well as the limitation. There is a clear description of the limitations and constraints faced by the evaluation team as well as the mitigating steps on p11 (Section 3.5) of the main report. The gaps in evidence are discussed in relation to the Regional Programme Evaluations (RPE) that ran concurrently with the SPEs as not all the reports were ready during the data synthesis phase. The main report explicitly refers to adhering to UNEG's Rooms and Standards for Evaluation and that it abides by UNEG Ethical Guidelines and Code of Conduct. It also refers to the team's adherence to UNEG's gender-related norms and standards. It describes doing so by 'incorporating a systematic approach to the enalysis' and it included a deep dise on gender and social norms. It also outlines its alignment with UNEPA's cross-cutting principles on the conduct of the c
viguestion 9.	chain or logical framework (e.g. methods help to understand the causal connections, if any, between outputs and expected outcomes (37RS). Clear and complete description of the methods of analysis, including explainability and full disclosure of the use of Al in the evaluation process, if applicable. Clear and complete description of limitations and constraints faced by the evaluation in its data collection and analysis, including gaps in the evidence that was generated and mitigation of bias, and how these were addressed by the evaluation of size faesible). Are ethical issues and considerations described? The evaluation is to, the evaluation report should include: Explicit and contextualized reference to the UNEG obligations of evaluation. As such, the evaluation report should include: Explicit and contextualized reference to the UNEG obligations of evaluation. As such, the evaluation report should include: Clear description of ethical issues and considerations (e.g. respect for dignity and diversity, fair representation, confidentiality, and avoidance of harm) that may arise in the evaluation, safeguard mechanisms for respondents (e.g. panental consent forms for adolescents, compliance with codes for vulnerable groups, WHO standards of a deta collection on GBV) and ethical considerations in the use of Al as applicable (e.g. transparency of use, explainability, privacy, data protection, accuracy, human rights), if Al is used in the evaluation, there should be transparency and disclosure on the ethical and responsible use of Al in the report.	Yes Yes Partially	As mentioned above in 7i, this evaluation is formative to assess organisational readiness and strategic position. There is a clear description of the method of analysis in Section 3.4. This includes the use of the evaluation matrix as the framework for analysis and synthesis of data. It describes the use of the indicators and process of triangulation. The sub-questions were used as unit of analysis to develop findings it also explains how different contexts were analysed to identify patterns and findings, as appropriate. The use of AI in the evaluation is elaborated on it Annex 4 (Section 5.5). It explains how AI model was trained, what check were in place, as well as the limitation. There is a clear description of the limitations and constraints faced by the evaluation team as well as the mitigating steps on p11 (Section 3.5) of the main report. The gaps in evidence are discussed in relation to the Regional Programme Evaluations (RPE) that ran concurrently with the SPEs as not all the reports were ready during the data synthesis phase. The main report explicitly refers to adhering to UNEG's Norms and Standards for Evaluation and that it abides by UNEG Ethical Guidelines and Code of Conduct. It also refers to the team's adherence to UNEG's gender-related norms and standards. It describes doing so by 'incorporating a systematic opproach to the enalysis' and it included a deep dive on gender and social norms, it also outlines its alignment with UNEPA's cross-cutting principles such as disability inclusion, leaving one behind and social and environmental standards. These references are found in Section 3.1. However, there is lack of contextualization, describing how the norms and standards were used in the evaluation. This report would benefit from additional details on ethical considerations. While it makes references to several ethical guidelines and principles in 91 above, it lacks detail on specific areas such as confideratingly and data protiction. Including data collection protocols in the Annex word of

	i Findings are presented clearly and provide sufficient levels of		
	evidence to systematically address all the evaluation's questions	Yes	The findings (Section 4) are clearly presented. They are structured according to the four main evaluation questions and it is evident that the sub- questions are also addressed, often as key findings within the main evaluation question. The start of each main question is followed by a summary 'overall response' that directly answers the question. These are very well summarised and also help orient the reader to the more granular findings. The main findings for each evaluation question are presented in a text box form followed by supporting evidence.
i	i Explicit use of the evaluand's theory of change, results chain, logical framework in the formulation of the findings.	Yes	As mentioned above in 7i, this evaluation is formative to assess organisational readiness and strategic position.
Question 12.	Are evaluation findings derived from credible data sources as well as a rigorous data analysis?		
	Evaluation uses credible forms of qualitative and quantitative data. It presents both output and outcome-level data as relevant to the evaluation framework. Triangulation is evident using multiple data sources.	Yes	The evaluation uses credible forms of qualitative and quantitative data. The data sources are provided as footnotes on each page of the findings section. It presents the key areas outlined in the analytical framework i.e. the extent to which the accelerators and strategic shifts have "supported enhanced programming of globol, regional and county levels". This is evident in the findings for CEL1 and EQL2, in particular. Triangulation is demonstrated through the inclusion of both primary and secondary sources, with references provided in footnotes on nearly every page within the findings section. Evaluators could consider incorporating an assessment of the evidence strength used in the analysis. However, this is not a requirement under the valuation criteria and therefore does not affect the scoring. This suggestion is intended to enhance the transparency and credibility of the presented evidence.
	Findings are clearly supported by the evidence presented, both positive and negative. Findings are based on clear performance indicators, standards, benchmarks, or other means of comparison as relevant for each question.	Yes	As mentioned in Q11i above, the findings are clearly supported by the evidence presented. Each key finding is summarised in a text box, which is followed by supporting evidence. The findings are often manced and include both positive and negative evidence. There is evidence that some of the indicators and assessment criteria from the evaluation framework have been applied.
ii	I Causal factors (contextual, organizational, managerial, etc.) leading to achievement or non-achievement of results are clearly identified. For theory-based evaluations, findings analyse the logical chain (progression -or not- from outputs to high level results).	Yes	Although this is not an output/outcome/impact evaluation, the report examines the extent to which 'enablesr' facilitated the implementation of the accelerators and strategic. This is covered under £03 (a 24-41) with the key enablers assessed, as per the sub-£0 and analytical framewin, include knowledge management, strategic communication, business model and human resources. Other enablers are also assessed such as 'innovative partnerships' (see finding 15).
Question 13.	Does the evaluation assess and use the intervention's Results Based Management elements?		
	Assessment of the adequacy of the intervention's planning, monitoring, and reporting system including completeness and appropriateness of results/performance framework-including vertical and horizontal logic, M&E tools and their usage) to support decision-making.	Not Rated	While this is not a programmatic evaluation, it assesses 'data and evidence', which is one of the six accelerators, for supporting enhanced programming at global; regional and country level. This is seen, in particular, in the findings section related to CEJ (see pars 64 and 63 as examples). There is also some references to the Integrated results and resources framework (IBRF), although limited, in the findings section (see para 62 as an example).
SECTION F: Question 14.	EVALUATION CONCLUSIONS (weight 10%) Do the conclusions clearly present an unbiased overall assessment of	#REF!	Comments on Rating
	the evaluand? Conclusions are clearly formulated and present unbiased summative		The conclusions are clearly formulated and present an unbiased summative statements, which are backed with supporting evidence. What is very helpful
	statements that respond to the evaluation questions.	Yes	is the introductory text to the conclusion section, which explains how the conclusions were developed. It also describes the level they are aimed at it. Closusing on "suses that are relevant to a thigh strategic level, rather than or details of IURPA operationalization of the Strategic (Pan 222025'. There are five conclusions in total and the evaluators have added the main findings linked with each conclusion. While they are not presented according to evaluation questions, the conclusions respond to the evaluation questions.
	Conclusions are well substantiated and derived from findings and add deeper insight and analysis beyond the findings.	Yes	As mentioned above in 14ii, the conclusions are well substantiated and are derived from findings. The evaluators have included specific findings related to each conclusion. The conclusion are not a mere summary of the findings, as relevant to each evaluation question, but they take a step back to look across all the findings. In so doing, they offer a deeper insight and analysis beyond the findings.
Question 15.	Are lessons learned identified? [N/A if lessons are not referenced or requested in ToR]		
	Lessons learned are derived from the findings and are well substantiated with practical, illustrative examples.	Not Rated	There is no separate section on lessons provided in this evaluation report. It is not stated as a requirement in the ToRs (see Annex 5 of the ToR under 'Outline of Final Report')
i	Lessons learned are clearly presented and provide actionable insights on the positive aspects of the evaluand as well as any areas of improvement.	Not Rated	There is no separate section on lessons provided in this evaluation report. It is not stated as a requirement in the ToRs (see Annex 5 of the ToR under Outline of Final Report)
SECTION G: Question 16.	EVALUATION RECOMMENDATIONS (weight 15%)	#REF!	Comments on Rating
	Are recommendations well-grounded and articulated? Recommendations are clearly formulated and logically derived from the findings and/or conclusions.	Yes	The evaluation report combines the conclusion and recommendation section together, in that recommendations follow individual conclusions made. This structure makes sense as the recommendations logically follow the conclusion and it avoids duplicating information if presented separately. It also increases the line of sight between the recommendations and conclusion. In addition, references to key findings are provided in the conclusion. The recommendations are clearly formulated.
	i Recommendations are useful and actionable for primary intended users. Specific guidance is provided for its implementation (e.g.		Each recommendation includes a series of suggested actions. The targeted responsible units (lead and additional units) are identified against each
'	actions, deadlines, responsible actors), as appropriate.	Yes	suggested actions. Given that this is an evaluation of a Strategic Plan spanning several levels, this makes sense. The deadlines are also identified in a corresponding column.
		Yes	suggested actions. Given that this is an evaluation of a Strategic Plan spanning several levels, this makes sense. The deadlines are also identified in a
ii	actions, deadlines, responsible actors), as appropriate. Process for developing the recommendations is described, and includes the involvement of key stakeholders (e.g., evaluation reference group members), including those who will be affected by the recommendations. Recommendations are clearly articulated and prioritized based on their importance, urgency, and potential impact.	Yes Partially	suggested actions. Given that this is an evaluation of a Strategic Plan spanning several levels, this makes sense. The deadlines are also identified in a corresponding column. The process for developing recommendations is described on page 45. It mentions discussions with the evaluation reference group to co-develop recommendations. It also takes into account discussions with senior management of UNFPA. The recommendations and suggested actions are clearly articulated. While there is no priority rating, target dates/deadlines are provided, which indicate a level of prioritisation. However, it does not specifically mention importance, urgency and potential impact. This may be helpful to include, particularly where there are dependencies i.e. one supporting action affects the delivery of another. Moreover, the UNFPA Evaluation Handbook requires provintisation to the made explicit (bundedum/high).
iii	actions, deadlines, responsible actors), as appropriate. Process for developing the recommendations is described, and includes the involvement of key stakeholders (e.g., evaluation reference group members), including those who will be affected by the recommendations. Recommendations are clearly articulated and prioritized based on their importance, urgency, and potential impact. REPORT STRUCTURE AND PRESENTATION (weight 5%) Does the evaluation report include all required information?	Yes	suggested actions. Given that this is an evaluation of a Strategic Plan spanning several levels, this makes sense. The deadlines are also identified in a corresponding column. The process for developing recommendations is described on page 45. It mentions discussions with the evaluation reference group to co-develop recommendations. It also takes into account discussions with senior management of UNFPA. The recommendations and suggested actions are clearly articulated. While there is no priority rating, target dates/deadlines are provided, which indicate a level of prioritisation. However, it does not specifically mention importance, urgency and potential impact. Newewer, it is worth notting that this report is not the final graphically designed report, which would include a standard cover page with the year of the report. The Annexes include the Terms of Reference, Evaluation Matrix, Persons interviewed, Document reviewed, and Ethical and Responsibility designed report, which would include a standard cover page with the year of the report. The Annexes include the Terms of Reference,

Evaluation's data collection methods designed to capture the voices/perspectives of a wide range of stakeholders including right holders, marginalized and vulnerable persons, young people, people with disabilities, migrants or refugee populations, indigenous communities, and other persons that are often left behind.		The evaluation design focused on internal stakeholders i.e. mainly UNFPA staff at global, regional and country level. It did not involve the participation of rights holders as its focus is primarily on assessing the organisation's readiness and strategic positioning to accelerate progress towards achievement of the three transformative results. It did, however, interview a wide range of stakeholders (Ahrnex 8) including UNFPA HQ, regional stakeholders, external stakeholders and 12 country studies.
Evaluation questions address cross cutting issues, such as human rights-based approach, gender equality, disability inclusion, LNOB, social and environmental standards as appropriate.	Yes	The evaluation questions addressed cross cutting issues, and the evaluation assessed accelerators such as human-rights based approach, gender transformative approaches, 'leaving no one behind', and resilience and adaptation.

Data is disaggregated by population groups (e.g. persons with disability, age gender, etc.) where there are implications related to UNFPA's portfolio/interventions for these population groups; different groups different groups.	Yes	Bata is disaggregated by gender for key informant intensiews (see Table 4 on p.10). There is also some disaggregation based on secondary sources, primarily by gender and adolescents and youth. As the equalation is formative and is not intended to assess an intervention's results, but more the organisation's readiness and strategic positioning, this is less relevant.
Intersectional lens is applied in the data analysis, looking at various and multiple forms of exclusion and discrimination (and how they overlap with each other) and how this may impact the performance or results of the evaluand.	No	An intersectional lens is not mentioned in relation to the data analysis.
Findings, conclusions and recommendations, address cross-cutting issues such as equality and vulnerability, disability inclusion, leave no- one behind, social and environmental as relevant.	Yes	The findings, conclusions and recommendations address cross-cutting areas such as equality, vulnerability in areas such as HIV, adolescence and ageing. The findings section also address leave no one behind.
Inclusion of young people in the evaluation team and/or Reference Group [N/A if not requested in ToR]	Not Rated	The inclusion of young people in the evaluation team is not mentioned in the Report. However, this is not requested in the ToRs.
Does the evaluation meet UN SWAP evaluation performance indicators? Note: this question will be rated according to UN SWAP standards with detail provided below	#REF!	Comments on Rating
GEEW is integrated in the Evaluation Scope of analysis, and evaluation criteria and questions are designed in a way that ensures GEEW-related data will be collected.	Fully integrated	GEEW is integrated in the evaluation scope of analysis as this is reflected in the indicators (i.e. 'areas of investigation') for at least the first three sub- questions, as reflected in the evaluation matrix. While the objective does not explicitly state GEEW in the objective, the objective, the objective, the objective, the objective is to assess organisational readiness to achieve the 3TRs, which are focused on gender considerations. In addition, the evaluation questions look at accelerators, of which 'human rights-based and gender-transformative approaches' is one. Gender and social norms was also identified as one of the five subjects for a deep dive.
A gender-responsive methodology, methods and tools, and data analysis techniques are selected.	Partially integrated	The evaluation employs a mixed-methods approach. It uses a diverse range of data sources, primary and secondary to enhance accuracy and credibility. The gender composition of key informants is provided. However, the sampling strategy is not provided. This would be helpful as it could demonstrate how gender considerations were taken into account. Interview protocols were not provided to understand how consent was obtained. This is also not explained in the main report.
The evaluation Findings, Conclusions and Recommendations reflect a gender analysis.	Satisfactorily integrated	The evaluation findings, conclusions and recommendations reflect a gender analysis. The findings section discuss countries where human rights and gender equality was regressing. The findings include data analysis that disaggregates data, where applicable. The evaluation report also provides specific suggested actions under recommendations that address GEEW ISSUE.

SWAP Rating Guidance

- GEEW is integrated in the evaluation scope of analysis, and evaluation criteria and questions are designed in a way that ensures GEEW-related data will be collected.

 a. Does the evaluation assess whether sufficient information was collected during the implementation period on specific result indicators to measure progress on human rights and gender equality consideration criteria or was it imministron or was it imministration or was it imministration.

- If A gender-responsive methodology, methods and tools, and data analysis techniques are selected.
 a. Does the evaluation specify how gender issues are addressed in the methodology, including; how data collection and analysis methods integrate gender considerations and ensure data collected is disaggregated by sex? b. Does the evaluation methodology employ a mixed-methods approach, appropriate to evaluating GEVE considerations?
 c. Are a diverse range of data sources and processes employed (i.e. triangulation, validation) to guarantee inclusion, accuracy and credibility?
 d. Does the evaluation methods and sampling frame address the diversity of stakeholders affected by the intervention, particularly the most vulnerable, where appropriate?
 e. Were ethical standards considered throughout the evaluation and were all stakeholder groups treated with integrity and respect for confidentiality?

- iii The evaluation findings, conclusions and recommendations reflect a gender analysis.

 a. Does the evaluation findings, conclusions and recommendations reflect a gender analysis.

 b. Doe the finding include data analysis that explicitly and transparently frinangulates the voices of different social groups, and/or disaggregates quantitative data, where applicable?

 c. Are unanticipated effects of the intervention on human rights and gender equality described?

 d. Does the evaluation report provide specific recommendations addressing (GEWE issues, and priorities for action to improve GEWE or the intervention or future initiatives in this area?
