Annex 1: Summary Terms of Reference

Subject of the evaluation

The Evaluation Office will conduct a formative evaluation of UNFPA's organizational readiness and strategic positioning to accelerate progress towards the achievement of the three transformative results as articulated in the Strategic Plan 2022-2025. Effort will be taken to ensure complementary and synergy with the on-going mid-term review of the Strategic Plan 2022-2025.

Purpose

The purpose of this evaluation is to provide evidence to support UNFPA's learning related to what works (and what does not) to accelerate progress towards achievement of the transformative results and inform the design of the next Strategic Plan and its stated intent to focus on "unfinished business". This formative evaluation is a milestone within an 'evaluative evidence package', which is composed of several thematic and institutional centralized evaluations implemented under the last two Quadrennial Budgeted Evaluation Plans, a summative evaluation of the Strategic Plan scheduled in 2028, and this formative evaluation.

Objectives

The objective of this evaluation is to assess UNFPA's **organizational readiness and strategic positioning to accelerate the progress towards the achievement of the three transformative results and catalyse a discussion on the design of the next Strategic Plan given the state of progress on the SDGs**. New elements introduced in this Strategic Plan will be the focus – namely, the six accelerators for change - and the strategic shifts that were proposed, including flexibility and agility in programming, financing, innovation and partnerships.

Scope

The evaluation will focus on the current Strategic Plan period starting in 2022 until the end of data collection in early-2024. A forward-looking perspective will be maintained so that the evaluation results will benefit both the remainder of the current Strategic Plan and the development of the subsequent one.

Users

The primary intended users of the evaluation are: (i) UNFPA senior management; (ii) the UNFPA Policy and Strategy Division; (iii) the UNFPA Technical Division; (iii) the UNFPA Humanitarian Office; (iv) UNFPA business units at headquarters; and (v) UNFPA Regional and Country Offices. The results of the evaluation should also be of interest to a wider group of stakeholders, such as UNFPA Executive Board members and other UN organizations.

Methodological approach

The evaluation will be theory-based with aspects of an adaptive/developmental approach and will undertake the following data collection:

- Desk review of key documents related to the previous and current Strategic Plan, and strategic, corporate and programmatic documents
- Review of MTR survey data and evidence from audits

- Synthesis of evaluative evidence from corporate, regional and country evaluations
- Nested evaluations of the Regional Programmes, including visits to all six ROs
- Missions to selected country offices
- Interviews with UNFPA key informants across divisions, units and offices at global, regional and country levels
- Interviews with EB members
- Interviews with “comparator” agencies – primarily UN
- Deep-dive analyses on priority challenges for the organization and/or areas where the existing evaluative evidence base is particularly weak (see Annex 2).

Evaluation questions

The proposed evaluation questions will be prioritized and reduced during the inception phase following discussions with key stakeholders and based on areas identified through the MTR as key challenges.

Evaluation questions	Evaluation Criteria			
	Relevance	Coherence	Effectiveness	Efficiency
Forward-looking perspective				
i. To what extent should UNFPA reconceptualize the next Strategic Plan given the state of progress towards the SDGs and 3TRs?	X			
Accelerators				
ii. To what extent is each of the six accelerators relevant to the achievement of the 3TRs (HRBA & gender transformative approaches; innovation and digitalization; partnerships/SSTC/financing; data and evidence; LNOB; resilience and adaptation)?	X			
iii. To what extent have each of the six accelerators been clearly defined and operationalized – individually and in an integrated manner?		X	X	
iv. To what extent is each of the accelerators enhancing programming at regional and country-levels? What have been the enabling and inhibiting factors?			X	
Strategic Shifts				
v. To what extent is there alignment in the organizational focus on achieving the 3TRs?		X		
vi. To what extent are the effects of megatrends being incorporated?		X		

vii.	To what extent is UNFPA’s programming focusing on “populations left behind” and emphasizing “reaching those furthest behind first”?			X	
viii.	To what extent has UNFPA scaled up the provision of high-quality, comprehensive sexual and reproductive health information and services?			X	
ix.	To what extent has UNFPA expanded its humanitarian response capacity?			X	
x.	To what extent has resilience, prevention, preparedness and early action been mainstreamed into programme interventions?		X		
xi.	To what extent are the multisectoral needs of women, adolescents and youth, as well as structural inequalities, being addressed?			X	
xii.	To what extent is there increased flexibility in programming at the country level? Has this enabled increased coherence with other UN agencies on the ground?		X	X	
xiii.	To what extent has UNFPA’s normative role been strengthened?	X		X	
xiv.	To what extent has the focus shifted from funding to funding and financing the ICPD agenda?				X
xv.	To what extent have UNFPA’s partnerships expanded?	X		X	
xvi.	To what extent has UNFPA’s coordination and collaboration with the UN Development System supported increased joint accountability and acceleration towards the 3TRs?			X	
Enablers					
	To what extent has strategic communication facilitated the acceleration and strategic shifts foreseen in the Strategic Plan?				
	To what extent has human resource strategies and management facilitated the acceleration and strategic shifts foreseen in the Strategic Plan?				

Governance

The evaluation manager. The evaluation manager will have overall responsibility for the management of the evaluation process, including hiring and managing the (team of) external consultant(s). The evaluation manager is responsible for ensuring the quality and independence of the evaluation (in line with UNEG Norms, Standards and Ethical Guidelines).

The Director of the Evaluation Office will approve the selection of the Evaluation team, as well as the inception and evaluation reports.

The Regional Monitoring and Evaluation Advisors will co-manage the regional evaluation component of this evaluation. They will assist in the selection and hiring of a regional consultant, facilitate the work of the regional consultant and evaluation team members carrying out regional and country missions/desk reviews, and quality assure regional deliverables.

The evaluation reference group. The conduct of the evaluation will be followed closely by an evaluation reference group consisting of staff members of UNFPA and select external members. The internal evaluation reference group will play a key role in ensuring access to information and individuals, as well as reviewing draft deliverables.

Evaluation Timeline

	Evaluation Phase	Strategic Plan Evaluation Timeline	Mid-term Review of the SP Timeline
1	Inception phase Inception workshop Draft inception report Pilot country mission Final inception report	October – December 2023	
2	Data collection phase	January – April 2024	February – October 2023
3	Analysis	May 2024	November 2023 – January 2024
4	Reporting and review Draft final report Final report Executive Board paper to the Executive Board secretariat	June – September 2024	February – March 2024
5	Management response and dissemination Presentation to the Executive Board Dissemination of the report	February 2025	June 2024

Evaluation Team - Bio

Michael Reynolds (Team Leader) is a development economist with thirty years' experience working in international development. Formerly, a senior evaluator for the United Nations Development Programme and the World Food Programme, Michael has led, conducted, managed and supported independent evaluations at all levels and across over thirty countries. He has a PhD in Development Studies from SOAS, University of London.

Faith Tempest (Senior Evaluator) is an international development professional with over thirty years' experience focusing on social development, strategic planning, UN coherence and evaluation. Faith has participated in evaluations for several UN organizations and has worked with UNICEF and WFP evaluation offices in the enhancement of the evaluation function. She holds an MSc in Environmental Planning for Developing Countries from the University of Nottingham, UK.

Annex 3: Strategic Planning in UNFPA

1. This annex complements Chapter 2 of the evaluation report with more information on strategic planning in UNFPA, including details of the 2018-2021 Strategic Plan and implementation of the Strategic Plan 2022-2025. It also provides more detail including an analysis of the changes between recent and ongoing strategic plans.

7.1 The Strategic Plan 2018-2021

2. The highest-level strategic plan goal has remained largely the same over the past three strategic plans, starting with 2014-2017. However, the three transformative results (3TRs) were first identified in the UNFPA Strategic Plan 2018-2021.
3. **Common Chapter.** The UNFPA Strategic Plan, 2018-2021, introduced for the first time a common chapter, shared with UNDP, UNICEF and UN Women in line with General Assembly resolution 71/243, as well as the Secretary-General's repositioning report. The four organizations committed to working better together for the achievement of the SDGs, with a view to achieving greater coherence in support of results and specifically to strengthen how they work together in six areas where their collaborative advantages complement each other.¹
4. **Principles.** The 2018-2021 strategic plan identified key principles, including:
 - Protection and promotion of human rights
 - 'Leave no one behind' and 'reaching the furthest behind first'
 - Cooperation and complementarity in the development, humanitarian and peace-informed contexts
 - Reducing risks and vulnerabilities while strengthening resilience of populations
 - Gender-responsive approaches to programming at all levels
 - Improve accountability, transparency and efficiency.
5. **Integrated Results and Resources Framework.** The 2018-2021 IRRF identifies 4 outcomes:
 - Every woman, adolescent and youth everywhere, especially those furthest behind, has utilized integrated sexual and reproductive health services and exercised reproductive rights, free of coercion, discrimination and violence
 - Every adolescent and youth, in particular adolescent girls, is empowered to have access to sexual and reproductive health and reproductive rights, in all contexts
 - Gender equality, the empowerment of all women and girls, and reproductive rights are advanced in development and humanitarian settings
 - Everyone, everywhere, is counted, and accounted for, in the pursuit of sustainable development
6. **Business Model.** Modes of engagement for Country Offices defined in the strategic plan 2018-2021 included: advocacy and policy dialogue, capacity development, knowledge management to improve programming, partnerships and coordination, and service delivery.
7. A core component of the Strategic Plan 2018-2021 that carried over from the previous plan was the country classification system based on need and ability to finance the Country Programme. This system established 'quadrants' that were then color-coded and assigned different resource allocations based on the intersection of 'need' and 'ability to finance'. Countries in the 'red' quadrant received 50-60 per cent of UNFPA's regular resources while those in the 'yellow'

¹ Eradicating poverty; gender equality and women's empowerment of; strengthening data for sustainable development; coherence, complementarity, cooperation, and coordination within and between development and humanitarian activities; climate change; adolescent and maternal health and HIV

quadrant received 7-11 per cent. The Strategic Plan 2018-2021 also mapped out the modes of engagement by quadrant as a means of supporting Country Offices in their programme prioritization.

8. **Additional Annexes.** In addition to the standard annexes listed in Section 2.1, the SP also included three additional annexes on:
 - Alignment to the QCPR
 - Programme Accountability Framework
 - Working together to support implementation of the 2030 Agenda

7.2 Developing the Strategic Plan 2022-2025

9. As already noted, the process of developing the strategic plan 2022-2025 took into account the QCPR resolution. Also important for the programming and strategic positioning of UNFPA was the reform of the UN development system that started with two reports by the Secretary General in 2017² and formalized in General Assembly resolution 72/279³ in 2018.
10. The UNFPA SP would also need to consider an influential paper on Megatrends which set out details of these trends⁴ and was a precursor to the UN Secretary-General's report, Our Common Agenda.⁵ This was an agenda of action, designed to strengthen and accelerate multilateral agreements – particularly the 2030 Agenda – and make a tangible difference in people's lives. Our Common Agenda presents the Secretary-General's vision on the future of global cooperation through an inclusive, networked, and effective multilateralism. It sets out key proposals across the 12 commitments from the Declaration on the Commemoration of the 75th anniversary of the United Nations. Driven by the Secretary-General's "Common Agenda", a "Quintet of Change"⁶ aims to accelerate the UN family's transformation over five years from 2021-2026 focused on stronger capabilities for data, innovation, strategic foresight, behavioural science, and results.
11. The SP would also have to take into account lessons from the MTR of the Strategic Plan 2018-2021, evaluations of the regional programmes as well as the body of independent evaluations conducted by the UNFPA Evaluation Office.
12. Within this evolving context, UNFPA established an inter-divisional Working Group (IDWG) on the strategic plan and integrated budget in August 2020. In October 2020, it established twelve Task Teams to support the development of the next Strategic Plan (2022-2025)⁷, through identifying:
 - (a) ambitious but realistic targets
 - (b) pathways and drivers/enablers for reaching the targets
 - (c) innovative and collaborative strategies and approaches for driving the acceleration and leveraging scale-up of interventions
 - (d) capacities, structure and culture necessary to transform UNFPA into an agile, innovative and resilient organization for delivering the strategic results and ensuring to leave no one behind.

² United Nations. *Report of the Secretary-General on repositioning the United Nations development system to deliver on the 2030 Agenda: ensuring a better future for all* (A/72/124–E/2018/3). 11 July 2017; United Nations. *Report of the Secretary-General on repositioning the United Nations development system to deliver on the 2030 Agenda: our promise for dignity, prosperity and peace on a healthy planet* (A/72/684–E/2018/7). 21 December 2017.

³ United Nations. *Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system*. Resolution adopted by the General Assembly on 31 May 2018 A/RES/72/279. 2018

⁷ UNFPA. *Strategic Plan 20-22-2025 Development. Concept Note*. 16 July 2020

13. The strategic plan development aimed to leverage and build on the work of existing groups/initiatives e.g. Humanitarian Action (Humanitarian Office⁸), Leaving No One Behind (Technical Division), South-South and Triangular Cooperation (Policy and Strategy Division), Change Management (Office of the Executive Director), People Strategy (Division of Human Resources), results-based management (PSD), Information and Communication Technology (IT Division), Global and Regional Interventions (PSD) and Integrated Budget (Division of Management Services). The Task Teams focused on areas that were both strategically important and require consultation but had not been fully covered by existing groups or initiatives. Table 1 lists the complete set of key activities undertaken as part of the strategic plan preparation process.

Table A.7.1: Key steps in the development of the Strategic Plan 2022-2025

2020	July	Concept Note on the Strategic Plan 2022-2025
	17 August	EB informal Briefing on the roadmap to the Strategic Plan 2022-2025
	August	SP/IB Inter-divisional Working Group (IDWG) established

	26 August	EB workshop on SP/IB

14. A review of the alignment of UNFPA programming and operations to the transformative results under Strategic Plan 2018-2021 was commissioned by the Policy and Strategy Division in 2021. ¹² The review examined the extent to which UNFPA's programmes and operations are aligned to the 3TRs, what had facilitated and challenged UNFPA's alignment under that Strategic Plan and what emerging opportunities, as well as potential threats, there were to strengthening alignment to the 3TRs in the Strategic Plan 2022-2025. While not an evaluation, the review was carried out by two evaluators and many conclusions are visible in the current Strategic Plan.

⁸ Now Humanitarian Response Division

⁹ focusing on the 'how' - acceleration, adaptation and accountability for the new SP -

¹⁰ She pointed out that the SP 2022-2025 is the time to be bold and act with passion, to do more and better in advancing the ICPD Plan of Action.

¹¹ With participation of the ASRO Regional Director, Deputy Regional Director, advisors, specialists and Country Office Reps

¹² UNFPA. External Review: Alignment of UNFPA Programming and Operations to the Transformative Results under the UNFPA Strategic Plan 2018-2021.

7.3 Implementation of the Strategic Plan 2022-2025

15. To ensure a systematic rollout of the strategic plan, 2022-2025, and equip all organization units with the necessary guidance, tools and systems, and capacities to implement the strategic plan, UNFPA prepared a 100-day plan of critical actions for the rollout¹³ (representing the time between the approval of the SP on 31 August 2021 and the start of its implementation 1 January 2022). The key actions fall under four broad areas:

- i. Programmatic support
 - SP implementation toolkit
 - Policy, guidance, tools
 - Resource Allocation System/Resource Distribution System
- ii. Technical support
 - Strategy guidance
 - Tools
- iii. OEE support
 - resource management (financial and human resource, ICT)
 - partnership and resource mobilization
 - strategic communication
- iv. Evaluation

16. The 100-day plan was monitored by PSD and according to a report dated Q1 2022¹⁴, of the 67 pieces of work listed in the 100 day plan, 49 had been completed, a completion rate of 73 per cent.

7.4 The Mid-Term Review of the Strategic Plan 2022-2025

17. In early 2023, UNFPA embarked on an internal MTR of the Strategic Plan 2022-2025, led by the Policy and Strategy Division.¹⁵ The process is due to be completed in June 2024 when the MTR report will be presented to the Executive Board. The objectives of the review are to:

- Assess the progress towards achieving the SP results to accelerate the progress towards the three transformative results
- Assess the implementation (alignment and execution including the strategic shifts) that was stipulated to improve the organizational readiness to accelerate
- Make necessary adjustments to the SP/IB 2022-2025 and its implementation in light of emerging opportunities and challenges
- Document major changes that may be considered for the Strategic plan 2026-2029.

18. The review included a survey of country offices, desk review, data analysis and consultations. These outputs are examined in the evaluability assessment (Annex 9). The process has led to some emerging findings that have been used in designing the Strategic Plan evaluation (see Table 2).

¹³ UNFPA. *100-Day plan for support the implementation of the SP 2022-2025*. Undated

¹⁴ It is unclear if it was at the beginning or the end of the quarter.

¹⁵ MTR Concept Note dated 9 January 2023

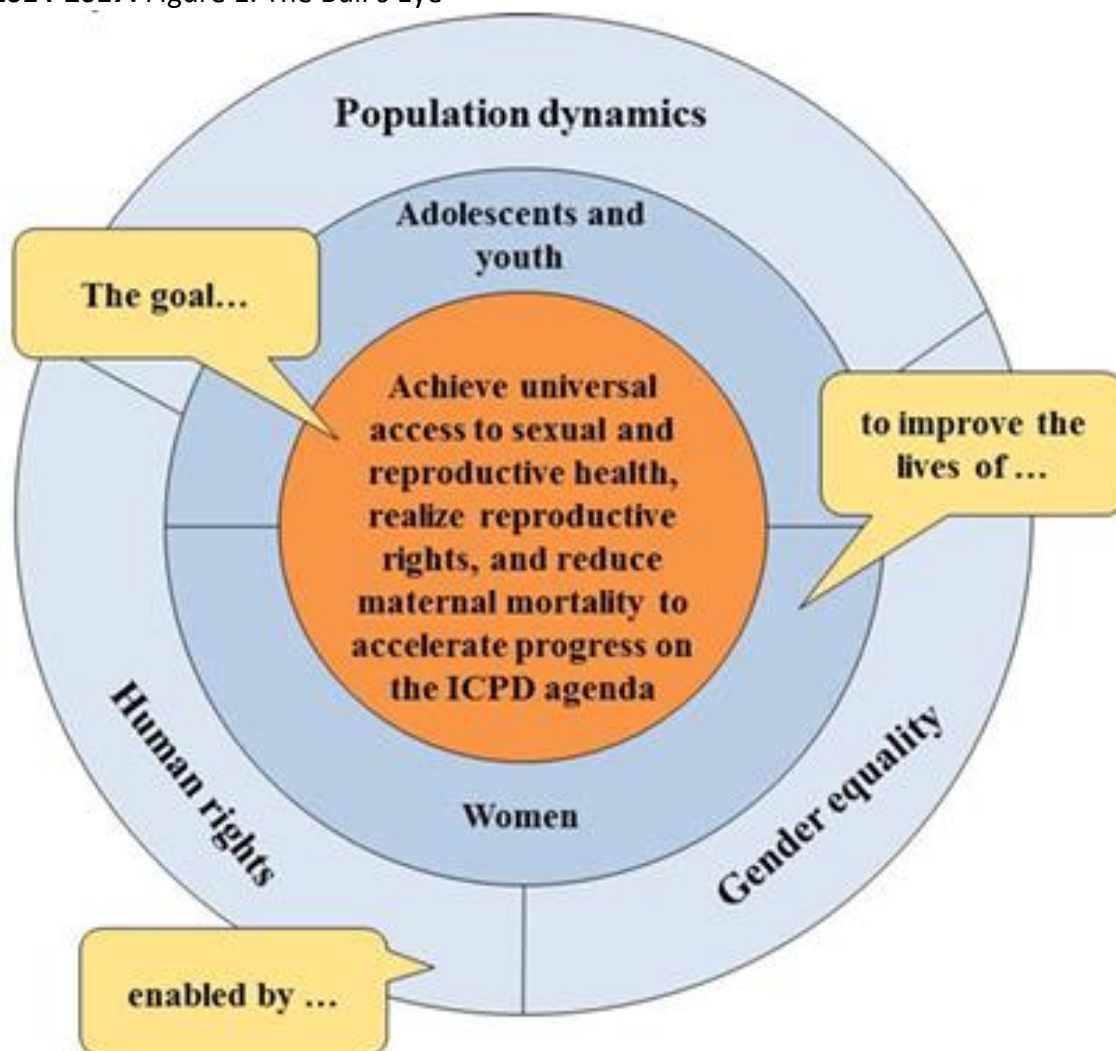

Table A.7.2: Designing the new Strategic Plan 2022-2025

<p>Narrative on 3 TRs and link to sustainable development.</p> <ul style="list-style-type: none"> oCOs struggle with anchoring the 3 TRs in the changing development contexts, particularly in M/HICs characterized by low fertility and rapid ageing, and the impacts of megatrends.
<p>Quality programming.</p> <ul style="list-style-type: none"> oLack of overall long term corporate vision of development challenges/pathways oOutput/intervention driven instead of outcome/impact driven oLimited data/evidence on immediate or intermediate outcomes and quality improvements
<p>Data & Analytics, and Strategic Intelligence</p> <ul style="list-style-type: none"> oInability to generate, analyze, and use data in areas where there are significant data gaps oOrganizational capacity gaps for long-term strategic foresight and scenario planning to inform corporate strategies/plans and future-ready programmes oLacking thought leadership/leading roles in population data
<p>Social Norms</p> <ul style="list-style-type: none"> oLack of capacity on Behavioural Change Communication in the organization oLack of proper operational guidelines and knowledge on social norm changes oWeak measurement/monitoring
<p>Focusing on accelerating the 3TRs</p> <ul style="list-style-type: none"> oNeed for better understanding on 'acceleration' oLimited understanding why some countries have not moved the needle on the 3TRs for decades oHow to use UNFPA's growing humanitarian presence to further accelerate towards the 3 TRs
<p>Normative Role</p> <ul style="list-style-type: none"> oLack of understanding in-house of what we mean by a normative role oDonors and partners are looking for much needed thought leadership of UNFPA in tackling difficult challenges and emerging issues oNot enough emphasis on high-level political dialogue and advocacy
<p>Funding to Financing</p> <ul style="list-style-type: none"> oLack of internal capacity at all levels about development financing oLimited practical guidance, models and tools for funding to financing oInsufficient harnessing of existing development funds
<p>Complementarity</p> <ul style="list-style-type: none"> oLack of common understanding what HDP programming is and agreed approach oGrowing siloed approach between development and humanitarian interventions oSeparate sets of guidance, tool and platform
<p>Integration of Megatrends</p> <ul style="list-style-type: none"> oLack of clarity on who leads on the issue of megatrends oLimited technical support and capacity on the integration oInsufficient data/evidence and knowledge on megatrends, and lack of analysis and national research
<p>Knowledge Management</p> <ul style="list-style-type: none"> oNeed for timely and easily accessible guidance and documented successful interventions oNeed to strengthen data analytics, documentary evidence, and knowledge for advocacy oNeed to learn from and share with countries with similar contexts, and with partners for thought leadership
<p>Business Model</p> <ul style="list-style-type: none"> oOffice typologies do not respond to the different country contexts and our tier system oHeavily leaning towards service delivery, including using core resources oPerceived inflexibility to change HR structures and profiles of country offices
<p>OEE and Accountability</p> <ul style="list-style-type: none"> oLack of needed staff profiles and capacity to implement shifts (acceleration, F2F, megatrends, etc) oLack of accountability in delivering results oTools often insufficient not sophisticated enough to make COs more self-reliant oRisk averse and weak risk management

7.5 Differences between the ongoing and previous two strategic plans

7.5.1 The Bull's Eye

SP 2014-2017: Figure 1. The Bull's Eye

SP 2018-2021: Figure 1. Alignment of the “bull’s eye”–the goal of the UNFPA strategic plan–to the goals and indicators of the 2030 Agenda for Sustainable Development

SP 2022-2025: Demoted to the ToC Annex 2 Figure 1

Updated bull's eye with the UNFPA strategic vision and alignment to the Sustainable Development Goals

7.5.2 Modes of Engagement

Strategic Plan 2014-2017	Strategic Plan 2018-2021	Strategic Plan 2022-2025
Advocacy and policy dialogue/advice	Advocacy and policy dialogue.	Advocacy and policy dialogue.
Capacity development	Capacity development.	Capacity development.

7.5.4 Outcomes

Strategic Plan 2014-2017	Strategic Plan 2018-2021	Strategic Plan 2022-2025
1. Increased availability and use of integrated sexual and reproductive health services (including family planning, maternal health and HIV) that are gender-responsive and meet human rights standards for quality of care and equity in access	1. Every woman, adolescent and youth everywhere, especially those furthest behind, has utilized integrated sexual and reproductive health services and exercised reproductive rights, free of coercion, discrimination and violence	1. Accelerated the reduction of unmet needs for family planning

<p>2. Increased priority on adolescents, especially on very young adolescent girls, in national development policies and programmes, particularly increased availability of comprehensive sexuality education and sexual and reproductive health services</p>	<p>2. Every adolescent and youth, in particular adolescent girls, is empowered to have access to sexual and reproductive health and reproductive rights, in all contexts</p>	<p>2. Accelerated the reduction of preventable maternal deaths</p>
<p>3. Advanced gender equality, women's and girls' empowerment, and reproductive rights, including for the most vulnerable and marginalized women, adolescents and youth</p>	<p>3. Gender equality, the empowerment of all women and girls, and reproductive rights are advanced in development and humanitarian settings</p>	<p>3. Accelerated the reduction of gender-based violence and harmful practices.</p>
<p>4. Strengthened national policies and international development agendas through integration of evidence-based analysis on population dynamics and their links to sustainable development, sexual and reproductive health and reproductive rights, HIV and gender equality</p>	<p>4. Everyone, everywhere, is counted, and accounted for, in the pursuit of sustainable development</p>	

Annex 4: Detailed methodology

19. This Annex complements Chapter 3 of the main report with additional information on the methodology, approach and process of the evaluation.

6.1 Evaluation Questions

20. This section looks at the evaluation questions and sub-questions as well as the analytical framework that was used to answer them. The evaluation team took the proposed evaluation questions in the ToR and adjusted them according to the conceptual framework in Chapter 2 of the main report.

The Analytical framework

21. The analytical framework was used by the evaluation to better understand and learn from the shifts, their relevance, operationalization and use to enhance programming. It specifically relates to EQ1 and EQ2 that assess the effective operationalization of the strategic shifts and accelerators. Overall, the framework sets out three lines of inquiry (derived from the questions on accelerators found in the evaluation ToR) that was applied to the assessment of the accelerators and strategic shifts:
22. **Relevance of Strategic Shifts and Accelerators.** When assessing the relevance of the strategic shifts and accelerators, the following lines of inquiry were followed: (a) Whether the strategic shifts and accelerators are the right approaches to achieve the 3TRs and other goals of the SP (b) If some accelerators and strategic shifts are more relevant than others, (c) If the strategic shifts and accelerators set out in the Strategic Plan are enough, and (d) If some potential shifts and accelerators been left out.
23. **Operationalization of Strategic Shifts and Accelerators.** Three dimensions of operationalization that were examined :
 - i. Readiness for change and implementation (including timing)
 - Enabling environment including resources, leadership, etc
 - Institutional capacity put in place including guidance, knowledge, processes, mechanisms, systems, etc.
 - Individual capabilities and incentives
 - ii. Efficiency of the process of operationalising the strategic shifts and accelerators
 - iii. Integration and coherence across strategic shifts /accelerators (internal coherence); Integration and coherence of strategic shifts/accelerators with UN system wide approaches (external coherence).
24. **Enhanced programming through implementation of strategic shifts and accelerators:** In this evaluation the assumption was that simply incorporating strategic shifts or accelerators is enhanced programming that strengthened UNFPA's contribution to the 3TRs. The evaluation did not examine if enhanced programming led to better results or a greater contribution to the 3TRs. This will be the role of the summative evaluation that the IEO will conduct at the end of the Strategic Plan.
25. **Enablers of the above:** EQ 3 focused on the extent to which the enablers identified in the ToR and subsequently during the inception mission are facilitating the operationalisation of the accelerators and shifts.

26. Although the forward-looking perspective was proposed as the first evaluation question in the ToR, it became EQ4; a full response to it was only possible once a clear picture had been formed on the other three EQs.

The evaluation questions and sub-questions

27. Table 4 sets out the revised evaluation questions that were used in the evaluation. They form the basis of an evaluation matrix (Annex 5) that links each sub-question to areas of investigation, lines of inquiry, indicators, sources of data and data collection methods. The evaluation questions also determined the structure of the evaluation report.

Table 4: Evaluation Questions

Accelerators
EQ 1: To what extent have the accelerators been relevant, operationalized, and supported enhanced programming at global, regional and country levels?
1.1 To what extent is each of the six accelerators relevant to the acceleration towards and then achievement of the 3TRs and other goals of the SP?
1.2 To what extent have each of the six accelerators been clearly defined and operationalized – individually and in an integrated manner?
1.3 To what extent is each of the accelerators being implemented to enhance programming at regional and country-levels? What have been the enabling and inhibiting factors?
Strategic Shifts
EQ 2: To what extent have the strategic shifts¹⁶ made under the strategic plan supported enhanced programming at global, regional and country levels?
2.1 To what extent is each of the strategic shifts relevant to the achievement of the 3TRs and other goals of the SP?
2.2 To what extent have each of the strategic shifts been clearly defined and operationalized – individually and in an integrated manner?
2.3 To what extent is each of the strategic shifts being implemented to enhance programming at regional and country-levels? What have been the enabling and inhibiting factors?
Enablers
EQ 3: What are the enablers of SP implementation and to what extent have they facilitated the acceleration and strategic shifts foreseen in the Strategic Plan?
3.1 To what extent has strategic communication facilitated the effective, efficient and coherent implementation of the accelerators and strategic shifts foreseen in the Strategic Plan?
3.2 To what extent has human resource strategies and management facilitated the effective, efficient and coherent implementation of the accelerators and strategic shifts foreseen in the Strategic Plan?
3.3 To what extent has knowledge management facilitated the effective, efficient and coherent implementation of the accelerators and strategic shifts foreseen in the Strategic Plan?
3.4 To what extent has the UNFPA business model facilitated the effective, efficient and coherent implementation of the accelerators and strategic shifts foreseen in the Strategic Plan?
3.5 What other enablers can be identified and to what extent have they facilitated the acceleration and strategic shifts foreseen in the Strategic Plan?
Forward Looking Perspective
EQ 4: To what extent is the conceptualization of the next Strategic Plan as ‘unfinished business’ still relevant, given the state of progress towards the SDGs and 3TRs?
4.1 To what extent are the goals and targets of the Strategic Plan 2022-2025 still achievable?
4.2 To what extent does the strategy of the SP 2022-2025 to accelerate progress towards the 3TRs remain relevant?
4.3 To what extent is the logic of the series of three SPs leading up to 2030 still appropriate?

¹⁶ Of the 12 strategic shifts, there are four that fully overlap with the accelerators (see Box 2). This evaluation question will assess the remaining eight strategic shifts.

6.2 Methodology and Approach

28. This section sets out the overall approach to design of the evaluation based on the evaluability assessment. It also sets out the data collection and analysis strategy and how the evidence was synthesised across different streams.

Summary of the evaluability assessment

29. **Stakeholder demand and utility of the evaluation.** The evaluation is included in the UNFPA quadrennial Budgeted Evaluation Plan 2022-2025 at the request of both UNFPA management and the Executive Board. The main interest was to provide evidence to influence the design of the next UNFPA strategic plan 2026 - 2029. Discussions at UNFPA HQ and the inception mission indicated a clear understanding that the evaluation could offer additional value to the ongoing MTR, not least because of its independent, external nature but also because it would have the opportunity to go deeper into critical issues identified in the MTR. The timing of the evaluation fits well into the standard approach to designing the next strategic plan.
30. **Assessment of SP design.** The list of strategic shifts is a mixed bag of issues many of which are not strategic or shifts. There is also a degree of incoherence between the use of some of the shifts in different parts of the Strategic Plan 2022-2025 and its annexes. To address this issue the conceptual framework was developed. Efforts were made to ensure a consistent understanding of the concepts is used in the evaluation.
31. **Quality and availability of data.** The evaluation is building on the body of evidence gathered for the MTR which acted as the foundation for further data collection. Important documents, such as the CPDs are publicly available and any changes, for examples to results frameworks, can be found on internal UNFPA systems. The major challenge was to obtain budgetary and human resource data at a sufficiently granular level to enable the identification of patterns and assess the extent to which they affect the implementation of the strategic shifts.

Overall approach to evaluation design

32. The overall approach to the design of the evaluation stems from the evaluation questions set out in the previous section and builds includes the inputs from the evaluability assessment as well as the stakeholder mapping. The process of developing the approach was not a linear one but rather an iterative one that builds on evidence collected during the inception phase to develop an evaluation design that is possible within the time and resource constraints. To the extent possible the design was aligned with the ToR but where any amendments were made these were done with the agreement of the IEO and are explained in this report.
33. The design of the evaluation follows United Nations Evaluation Group (UNEG) Norms and Standards for Evaluation in the United Nations system¹⁷ and abides by UNEG Ethical Guidelines and Code of Conduct¹⁸ and any other relevant ethical codes. To meet the requirements of the United Nations System-wide Action Plan on Gender Equality and the Empowerment of Women (UN-SWAP), the

¹⁷ UNEG Norms and Standards for evaluation (2016) <http://www.unevaluation.org/document/detail/1914>

¹⁸ UNEG Ethical Guidelines for Evaluation (2020) <http://www.uneval.org/document/detail/2866>

evaluation adhered to the UNEG gender-related norms and standards (Norm 8¹⁹ and Standard 4.7²⁰). More specifically, it is aligned with the standards set out in the UNFPA Evaluation Quality Assurance and Assessment (EQAA) system (see section 6.7 for more information on quality assurance). The EQAA is aligned with the UN Disability Inclusion Strategy and includes related guidance on disability inclusion in UNFPA evaluations.²¹

34. Overall, the evaluation examines the organizational readiness or capacity of UNFPA to undertake the series of strategic and programmatic shifts that are intended to increase its contribution to the 3TRs as well as that of other stakeholders and ultimately accelerate progress towards them and relevant SDGs. The evaluation did not assess this contribution nor use a theory of change and test the associated assumptions in a model to results. Rather it is based on the macro-level assumption that the strategic and programmatic shifts resulted in an increased contribution of UNFPA while recognising (and assessing) that some may be more relevant than others. As its title suggests, it is taking a formative approach, focused on learning and aimed at supporting the development of the new SP.
35. The evaluation has a number of characteristics that influence this overall approach:
- **Aspects of a developmental approach.** The implementation of the strategic shifts including the accelerators, is taking place in a fluid environment, including from the changes envisaged as a result of the MTR. The evaluation design therefore included strong engagement with stakeholders throughout the process and share evidence in real-time, when appropriate. Specifically, selected outputs from the data collection and analysis phase would be discussed with relevant stakeholders during the data collection and analysis phase. Examples include the deep dives and the analysis of the Country Programme Documents that were undertaken as part of the evaluation (see section 5.3 for more details). Within the developmental approach, the evaluation would also be adaptive, responding to the changing context and needs of the organization, feedback from stakeholders and new issues identified in an inductive manner during the data collection and analysis phase.
 - **Drawing on existing evidence, specifically building on the ongoing MTR of the SP.** As noted in Chapter 2, the MTR is a comprehensive and participatory exercise that has already provided extensive feedback on SP implementation through surveys, desk reviews and focus group discussions. By the time of the start of the data collection phase for this evaluation, most of MTR data collection was concluded. The final MTR report was ready in time for the synthesis phase of the SPE in May 2024 and was presented to the Executive Board at the Annual Session in June 2024. The evaluation also took advantage of evidence from the MTR on key challenges and use it to identify areas for deep dives.
 - **Coordinated Regional Programmes Evaluations.** As noted in Section 2.1, Regional Programmes are evaluated within the programme cycle to inform the development of the subsequent programme.²² Early in the inception phase, agreement was reached with the Regional Offices that efforts would be made to jointly undertake the SP evaluation and the Regional Programme Evaluations (RPEs). The independent SPE and RPEs worked in a coordinated manner but with separate evaluation teams. The RPEs build their ToRs by adapting the SPE TOR to include regional

¹⁹ “The universally recognized values and principles of human rights and gender equality need to be integrated into all stages of an evaluation. It is the responsibility of evaluators and evaluation managers to ensure that these values are respected, addressed and promoted, underpinning the commitment to the principle of ‘no-one left behind’.”

²⁰ “The evaluation design should include considerations of the extent to which the United Nations system’s commitment to the human-rights based approach and gender mainstreaming strategy was incorporated in the design of the evaluation subject.”

²¹ Guidance on disability inclusion in UNFPA evaluations <https://www.unfpa.org/admin-resource/guidance-disability-inclusion-unfpa-evaluations>

²² For the previous SP cycle regional programme evaluations were conducted by ASRO, EECARO, ESARO and WCARO. LACRO conducted an evaluation of the Caribbean and APRO, an evaluation of the Pacific States.

specificities, including evaluation questions adjusted to regional priorities/contexts. This approach aims to avoid duplication and create synergies and efficiencies.

- **Exploring opportunities to leverage AI.** The evaluation utilized AI to the extent possible, especially in terms of content analysis of the large body of UNFPA programmes. Opportunities to use AI in relation to data analysis, data visualization and synthesis across bodies of evidence were also explored. All utilization of AI was undertaken in accordance with UNFPA, UN and UNEG rules and regulation concerning AI as well as collecting, analysing and storing data.

6.3 Categories of strategic shifts

36. The evaluation team divided the strategic shifts into three categories: shifts that were also accelerators; shifts that were *adjustments*, where an important strategic change was necessary; and, shifts as *amplifications*, where UNFPA was expected to do more of something it was already doing at the programme level. Table 3 illustrates this categorization of strategic shifts, setting out the adjustments and amplifications.

Table 3: Categories of strategic shifts – adjustments and amplifications

<p>Strategic Adjustments.</p> <p>a) Aligning the organizational focus on achieving the three transformative results</p> <p>h) Tailoring programmatic and technical assistance to better respond to local contexts through a country office-led process, “within the United Nations family on the ground”</p> <p>j) Shifting the focus from <i>funding</i> the ICPD agenda to <i>financing</i> the ICPD agenda</p> <p>l) Increasing the focus on joint accountability, in line with United Nations reforms, principles and practices</p>	<p>Strategic Amplifications.</p> <p>b) Integrating the effects of megatrends, such as climate change, demographic shifts, inequalities and digitalization, into programming</p> <p>d) Scaling up the provision of high-quality comprehensive sexual and reproductive health information and services, as part of universal health coverage plans</p> <p>e) Expanding the humanitarian response capacity to better safeguard the lives of women, adolescents and youth, especially adolescent girls, while also addressing mental health and psychosocial issues</p> <p>i) Strengthening the UNFPA normative role in all countries where UNFPA is present</p>
--	---

37. The evaluation team also examined the strategic shifts from a second perspective that focuses on the difference between (a) shifts in what UNFPA does and (b) shifts in the way it leverages the work and resources of others. In the first category, there is a group of shifts that changes the focus on what UNFPA does. Inception meetings found that the stronger focus on 3TRs has implications for the role of areas such as population dynamics, gender, youth and HIV. At the same time, programmes are expected to engage with the megatrends while also tailoring the work to needs at the country level.

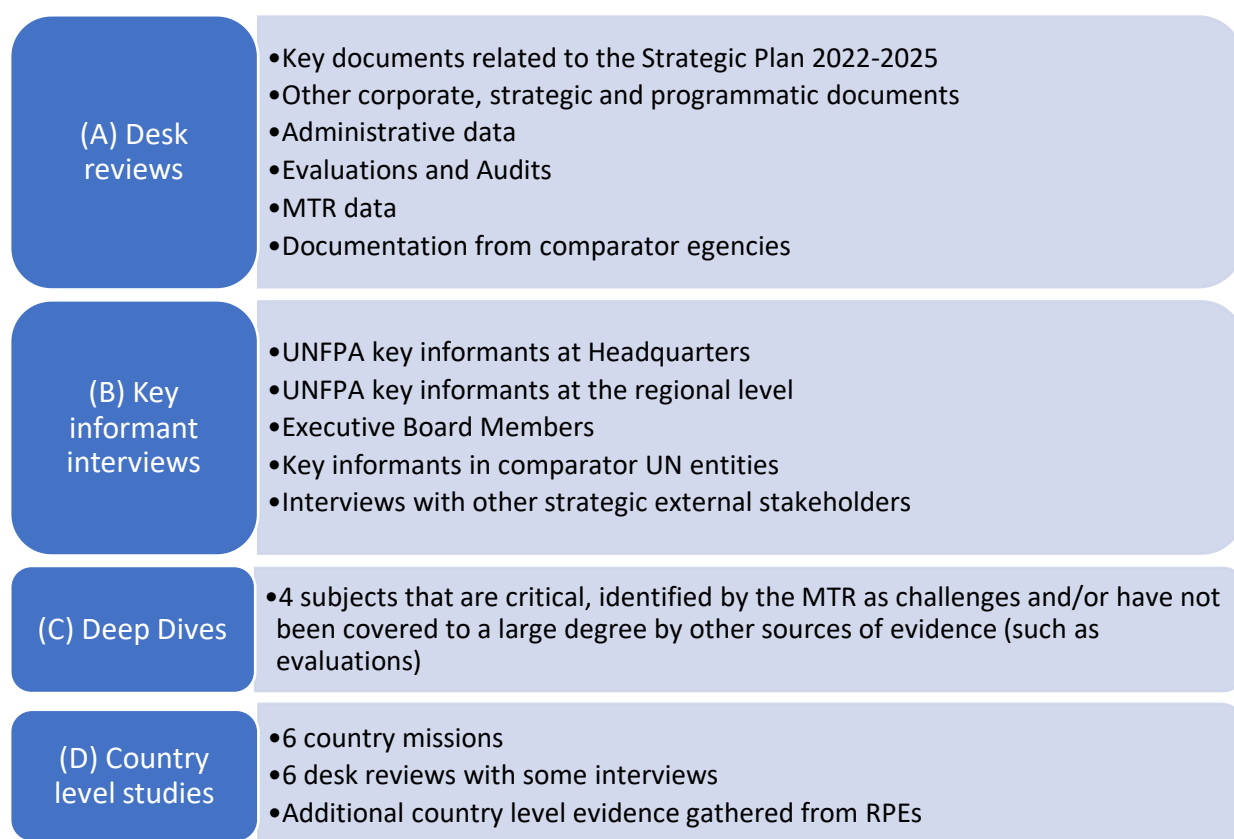

38. The second category has implications for acceleration to the 3TRs as leveraging the work and resources of others is an essential strategy to make significant progress in a short time. At the core of this groups is UNFPA’s normative role, working with governments and other partners to ensure services/ programmes are delivered by them. This is linked in the concept of moving from funding to financing, and ensuring that resources are available from whatever source to financing the required work, and especially scaling up of SRH services as emphasised in the strategic plan 2022-2025. The shift towards more joint accountability is also important in this respect.

39. These categories of shifts were used by the evaluation team when examining the evidence and identifying patterns of operationalization of the strategic shift and accelerators. They were also be useful when answering evaluation question 4²³ which examined the extent to which UNFPA should reconceptualize the next Strategic Plan given the state of progress towards the SDGs and 3TRs.

6.4 Data collection strategy

40. The initial set of qualitative and quantitative data collection and analysis tools was developed from the ToR and informed by the evaluability assessment. It also builds on the evidence collected for the MTR. The evaluation matrix was used to identify the specific tools for answering each evaluation sub-question. Figure 4 indicates the four clusters of evidence.

Figure 4: Four clusters of evidence

41. **(A) Desk reviews.** Desk reviews started in the inception phase and continued in the data collection phase. The following sets of documents were reviewed:

- Desk review of key documents related to the previous and current Strategic Plan. Strategic plan and annexes, annual reports, implementation guidance.
- Desk review of UNFPA’s strategic, corporate and programmatic documents. At the centre of this was a comprehensive review of CPDs. This was undertaken using generative AI tools in line with the guidance provided by the Digital and Technology Network of the Chief Executives

²³ “To what extent is the conceptualization of the next Strategic Plan as ‘unfinished business’ still relevant, given the state of progress towards the SDGs and 3TRs?” See Table 4.

Board for Coordination²⁴ and UNFPA. The evaluation team was supported by an AI specialist on contract with the UNFPA Evaluation Office, specifically on preparing the appropriate questions.

Table 5: CPD approval

CPD approval	Relevance to the evaluation	No.
2022 EB.A - 2024 EB.1	These are CPDs that were approved more than six months after the start of the SP should be designed in alignment with the SP and should have used the guidance to do so	37
2021 EB.A - 2022 EB.1	These are CPDs that were developed in parallel with the SP and/or the corresponding implementation guidance while the SP.	22
2021 EB1 and earlier	These are CPD that were and remain ongoing and would have to be aligned to the extent possible within the existing CPD.	58

- Review of Administrative data. The review included data on human and financial resources since the start of the SP 2018 - 2021.
 - Review of MTR data. The MTR included a survey of 20 questions (15 close-ended questions and 5 open-end) covering knowledge, alignment, strategic shifts as well as strengths, weaknesses, opportunities and threats. Offices replied non-anonymously and the response rate (COs, SROs and ROs) was 95% (121 out of 128). Data was collected from 22 March to 20 April 2023. In addition to analysis of the survey, the SPE team also examined other outputs from the MTR process including summaries of stakeholder consultations.²⁵
 - Review of evaluative evidence from corporate, regional and country evaluations²⁶. Key thematic evaluation and Country Programme Evaluations were reviewed (as well as management responses).
 - Review of strategies from “comparator” UN entities. Other UN entities have followed the same strategic plan cycle and face similar challenges to UNFPA. Reviews of strategic plans and related documents were undertaken for other entities: UNDP, UNICEF, and UN Women.
42. **(B) Key informant interviews and group discussions.** A series of internal and external interviews was conducted and used, as a starting point, a list of questions set out in Annex 14. Interviewees were identified in the process of stakeholder mapping (see Annex 5).
- Interviews with UNFPA key HQ informants across divisions, units and offices at global level building on the interviews conducted during the inception phase.
 - Interviews with regional offices. The evaluation team engaged with all 6 regional offices in a series of interviews.²⁷ To the extent possible these were with a member of the RPE team.
 - Survey EB members. A survey was sent to members of the EB but only two responses were received
 - Interviews with “comparator” UN entities. Interviews were held with other entities including UNDP, UNICEF, and UN Women. The interviews built on a review of the strategic plans of

²⁴ Chief Executives Board for Coordination Digital and Technology Network (2023) *Guidance on the Use of Generative AI Tools in the UN System*. CEB/2023/HLCM/DTN/14

²⁵ Where available, the evaluation team will also review MTRs undertaken separately by the regional offices.

²⁶ There is also a regional audit of LACRO that provides evidence directly related to programme alignment to the SP.

²⁷ EECARO was covered in the inception phase.

these organizations and specifically how they address some of the key challenges facing UNFPA.

43. **(C) Deep Dives into key issues.** The evaluation team identified four areas from across the accelerators and strategic shifts that represent priority challenges for UNFPA and/or where there is limited evaluative evidence (more detail on the selection process in Annex 10):
- Gender and social norms (strategic shift)
 - UNFPA normative role (strategic shift)
 - Move from funding to financing the ICPD Agenda (strategic shift)
 - Megatrends (strategic shift)
 - Knowledge management (enabler)
44. The two elements of the Innovation and digitalization accelerator were captured in the knowledge management and megatrends deep dives respectively.
45. **(D) Country level studies.** A selection of 12 countries was studied in more detail and complement other data collection methods that cover the entire set of UNFPA COs. This was not meant to be a representative sample; rather, it looks at countries in different contexts where lessons can be learned about how the strategic shifts are relevant and operationalized and the factors that can explain what is found. Full details on selection can be found in Section 6.5 of this annex.

Table 6: Selected countries for missions and desk reviews

	Country Missions	Desk Reviews	RPE Country Missions ²⁸
APRO	Nepal	Thailand	tbd
ASRO	Morocco	Djibouti	tbd
EECARO	Türkiye	Kyrgyzstan	2-3
ESARO	Botswana	South Sudan	tbd
LACRO	Bolivia	El Salvador	2-3
WCARO	Nigeria	Burkina Faso	2

46. Country study evidence tables that align with the evaluation matrix were prepared for each study. Two types of studies were undertaken by the core evaluation team for the SPE.
- **Missions to six country offices.** The evaluation team visited 6 country offices including the one visited during the inception phase, covering one office per region. These one week missions were conducted by one evaluation team member. Interviewees included UNFPA CO, national government partners, national NGO partners, international organization and specifically the UNCT. Where possible, a member of the relevant RPE team also participated in the mission.
 - **Desk reviews of six country programmes.** These relied on reviews of documentation as well as selected interviews at the country level. They were conducted after the country missions to allow the evaluators to probe into significant issues found in the missions.
47. **RPE Country missions.** In addition to the country data collection by the SPE team, RPE teams carried out country studies that included one or two key questions related to the SPE. The SPE team received evidence from at least X additional countries that fed into the synthesis process for this evaluation.

6.5 Lesson learned from using AI

The AI-generated analysis: scope, objectives and methodology

²⁸ Country selection for RPEs will be finalized during the inception phase for the evaluations

The SPE utilized an externally commissioned AI-tool (Ailyze) to compare 76 CPDs across two CP cycles. This CPD sample consists of documents that either were developed in parallel with or after SP 2022-2025 (refer to the table 1 in the annex).

For each country, the AI tool generated a comparison of the previous and current CPDs for each of the six accelerators and eight shifts defined in the UNFPA 2022-25 Strategic Plan. Some shifts/ accelerators consisted of multiple facets, so they were broken down into 30 sub-variables (see table 2). The SPE team provided definitions for the 14 accelerators and shifts, along with textual descriptions of the facets of each variable over the period of the last two Strategic Plans, to guide the identification of the 30 sub-variables on the documents for analysis.

The questions for the AI-generated analysis were:

- Has this accelerator or shift been operationalised in each of the CPDs?
- Is there a change in emphasis/focus/effort applied to this accelerator or shift between the two different documents?

The company undertaking the analysis uses its own proprietary approach and so we do not know specifically how these two questions were turned into prompts for the AI analysis.

The final output consists of an excel table where, for each country and each sub-variable, the AI tool identified:

1. Whether the sub-variable was operationalized in the previous CPD, offering a Yes/No answer, accompanied by a rationale and supported by two quotes as justification.
2. Whether the sub-variable was operationalized in the current CPD, offering a Yes/No answer, accompanied by a rationale and supported by two quotes as justification.
3. Any changes in the operationalization of the sub-variable between the current and previous CPDs: categorized as Increase, Decrease, or No Change, with reasoning to support the assessment.

Following the initial AI-generated output, three additional iterations were undertaken to “train” the AI tool's understanding of the sub-variables. During these iterative processes, the SPE team cross-checked the AI-generated analyses for the 12 countries selected for country-level studies within the SPE framework, providing additional inputs to train the tool.

Finally, to facilitate the identification and analysis of trends and patterns, a database with relevant information regarding each country contexts was created by the SPE team.

Utility and caveats

While we believe that the AI-generated analysis was helpful in identifying broad patterns, particularly when combined with the variables related to the programming context, we note several limitations in its application. The SPE team does not think that the AI-generated analysis can be taken at face value and purposeful triangulation was needed when using its outputs.

Key limitations identified in the AI-generated analysis include:

- **The accuracy of the analysis varies across sub variables.** While the AI effectively captures the operationalization and changes in some sub-variables, it struggles with

more nuanced definitions. For example, while climate change or urbanization are relatively straightforward, aspects like UNFPA's normative role or shifting from funding to funding and financing were not as easily captured.

- As the AI relies on language modelling, it has **difficulty capturing nuances** of how accelerators and shifts are portrayed in the CPDs.
- Some **errors in the analysis**, such as sub-variables being swapped within the same category or the current CPD being used for analysing the previous CPD, have also been identified.

Table 1. SP Evaluation 2023: Country Programme Documents for ALLYSE analysis (25/1/2024)

CPD approval	Relevance to the evaluation	N	# of documents to be reviewed	Countries
2022 EB.A - 2024 EB.1	CPDs approved more than six months after the start of the SP which should be designed in alignment with the SP and should have used the guidance to do so.	55	110 CPD ie ongoing and previous CPDs	Algeria Angola Benin Bhutan Bolivia Brazil Burundi Cambodia Cape Verde Central African Republic Chad Costa Rica Dominican Republic Ecuador Egypt Equatorial Guinea Gabon Gambia Ghana Guinea Haiti India Iran Lesotho Libya Jordan Kenya Kyrgyzstan Lebanon Madagascar Malawi Mauritania Moldova Mongolia Morocco Nepal Nicaragua Niger Nigeria Pacific Island Countries & Territories Pakistan Palestine Papua New Guinea Philippines Sao Tome and Principe Senegal South Sudan Sri Lanka Syrian Arab Republic Tajikistan Tanzania Togo Venezuela Yemen Zambia

6.6 Basic country office documents

Basic documents submitted to Executive Board (available on EB website)

- Ongoing CPD
- comments from member states on draft
- Previous CPD (if a new one since the start of the
- Costed Evaluation Plan
- CPE (if there is one)

Documents submitted to Programme Review Committee (available from country office)

- Country programme theory of change
- Integrated partnership and resource mobilization plan
- Human resource overview
- Strategic dialogue white paper and outcome document
- CPD political checklist
- Any investment cases
- Country Programme Performance Summary (CPPS)

Other

- CO annual reports
- Audits (if recent)
- Flagship Programme reports (including evaluations)
- Internal strategies (E.g. communication, innovation, others)

UNCT documents

- UNSDCF
- CCA
- UNCT annual reports

6.5 Country Selection Process

The core criteria for country selection are regional balance and the timing of country programme development: CPs which started before the 2022 Strategic Plan was being developed, CPs developed alongside the SP, and those developed after the 2022-25 Strategic Plan came into effect.

To ensure a balance of different country contexts several other status criteria were identified:

- Priority based on Tiers
- Humanitarian context (humanitarian spending in 2022)
- Demographic context (Total Fertility Rate above or below replacement level)
- Programme expenditure (RR levels 2022)

Countries which were the subject of country case studies for other strategic evaluations in 2023 or were audited in the last quarter of 2023 have been included in the analysis, but excluded from selection at this stage.

CPD approval: It is assumed that CPDs developed alongside the SP development process will reflect the priorities and approaches as outlined in the SP, which went to the Executive Board in September 2021.

Tiers: The SP classifies the 119 programme countries into three tiers to prioritize the countries furthest from achieving the three transformative results. Tier I comprises programme countries that have not achieved any of the three transformative results; tier II comprises programme countries that have not attained two of the three transformative results; and tier III comprises programme countries that have not attained one of the three transformative results. Thus we would expect to see variation in the use of accelerators and strategic shifts in the different tiers. Note that multi-country offices are excluded from the tier classification.

Humanitarian programming: This categorisation reflects any humanitarian spending in 2022, based on UNFPA's Humanitarian Action Report.

Programme expenditure: This is the indicative RR allocation at the time of CP approval. The resource allocation and resource distribution systems were adjusted with the introduction of the 2022 Strategic Plan. This set the minimum regular resource allocation to \$500,000 per office per year, meaning an allocation of at least \$2m over the strategic plan period. Additional regular resources are allocated applying a formula which factors in (a) the distance from the three transformative results thresholds; (b) the country vulnerability to risks; and (c) inequalities arising from communicable, maternal and prenatal conditions. In addition, the formula factors in country population size and the gross national income per capita.

Total Fertility Rate: TFR are drawn from the State of the World's Population Report 2022. Replacement rate is 2.1.

Office type: Offices with a Head of Office rather than a Country Representative.

Table A.6.5 Countries selected according to the selection criteria

Legend: **Green** – in-person country missions; **Yellow** – desk reviews + selective interviews

		APR	ASR	EECAR	ESAR	LAC	WCAR

Annex 5: Evaluation Matrix

EQ1: To what extent have the accelerators identified in the strategic plan supported enhanced programming at global, regional and country levels?			
Sub-questions	Areas of investigation	Main lines of inquiry	Sources/methods/tools
1.1 To what extent is each of the six accelerators relevant to the achievement of the 3TRs and other goals of the SP ?	<ul style="list-style-type: none"> • HRB and gender transformative approaches • Innovation and digitalization • Partnership, SSTC, and financing • Data and evidence • LNOB and “reaching the furthest left behind first” • Resilience, adaptation, and H-D-P 	Are the accelerators the right things to achieve the 3TRs and other goals of the SP?	(A) Desk reviews (B) KIIs: HQ staff, RO staff (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies
		Are some more relevant than others?	(A) Desk reviews (B) KIIs: HQ staff, RO staff (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies
		Are they sufficient?	(A) Desk reviews: 3TR costing study (B) KIIs: HQ staff, RO staff (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies
		Have some potential accelerators been left out?	(A) Desk reviews (B) KIIs: HQ staff, RO staff (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies
1.2 To what extent have each of the six accelerators been clearly defined and operationalized – individually and in an integrated manner?	<ul style="list-style-type: none"> • HRB and gender transformative approaches • Innovation and digitalization • Partnership, SSTC, and financing 	Is the enabling environment in place including resources, strategic direction and leadership?	(A) Desk reviews (B) KIIs: HQ staff, RO staff (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies

	<ul style="list-style-type: none"> • Data and evidence • LNOB and “reaching the furthest left behind first” • Resilience, adaptation, and H-D-P 	Is the institutional capacity in place including guidance, knowledge and processes.	(A) Desk reviews (B) KIIs: PSD, TD (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies
		Do staff members have the appropriate capabilities and incentives?	(A) Desk reviews (B) KIIs: HR staff (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies
		How efficient is the process of operationalising the accelerators?	(A) Desk reviews (B) KIIs (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies
		What is the level of integration and coherence across accelerators?	(A) Desk reviews (B) KIIs (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies
		What is the level of integration and coherence with UN system wide approaches?	(A) Desk reviews (B) KIIs (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies: RC/RCO, other UN entities
1.3 To what extent is each of the accelerators being implemented to enhance programming at regional and country-levels? What have been the enabling and inhibiting factors?	<ul style="list-style-type: none"> • HRB and gender transformative approaches • Innovation and digitalization • Partnership, SSTC, and financing • Data and evidence • LNOB and “reaching the furthest left behind first” • Resilience, adaptation, and H-D-P 	Have the accelerators been implemented at the regional and country level to enhance programming?	(A) Desk reviews (B) KIIs (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies
		If not, why?	(A) Desk reviews (B) KIIs (C) Deep dives: innovation and digitalization; gender and social norms (D) Country level studies

EQ2: To what extent have the strategic shifts made under the strategic plan supported enhanced programming at regional and country levels?

Sub-questions	Areas of investigation	Main lines of inquiry	Sources/methods/tools
<p>2.1 To what extent is each of the eight strategic shifts relevant to the achievement of the 3TRs and other goals of the SP?</p>	<ul style="list-style-type: none"> • Aligning the organizational focus on achieving the three transformative results • Integrating the effects of megatrends into programming • Scaling up the provision of high-quality comprehensive SRH information and services • Expanding the humanitarian response capacity • Tailoring programmatic and technical assistance to better respond to local contexts • Strengthening the UNFPA normative role • Funding the ICPD agenda to financing the ICPD agenda • Increasing the focus on joint accountability 	<p>Are the strategic shifts the right things to achieve the 3TRs and other goals of the SP?</p>	<p>(A) Desk reviews including MTR (B) KIIs (C) Deep dives: normative role, funding to financing (D) Country level studies</p>
		<p>Are some more relevant than others? Which ones?</p>	<p>(A) Desk reviews including MTR (B) KIIs (C) Deep dives: normative role, funding to financing (D) Country level studies</p>
		<p>Are they sufficient?</p>	<p>(A) Desk reviews (B) KIIs (C) Deep dives: normative role, funding to financing (D) Country level studies</p>
		<p>Have some potential strategic shifts been left out?</p>	<p>(A) Desk reviews (B) KIIs (C) Deep dives: normative role, funding to financing (D) Country level studies</p>
<p>2.2 To what extent have each of the eight strategic shifts been clearly defined and operationalized – individually and in an integrated manner?</p>	<ul style="list-style-type: none"> • Aligning the organizational focus on achieving the three transformative results • Integrating the effects of megatrends into programming • Scaling up the provision of high-quality comprehensive SRH information and services 	<p>Is the enabling environment in place including resources, strategic direction and leadership?</p>	<p>(A) Desk reviews (B) KIIs (C) Deep dives: normative role, funding to financing (D) Country level studies</p>
		<p>Is the institutional capacity in place including guidance, knowledge and processes.</p>	<p>(A) Desk reviews (B) KIIs (C) Deep dives: normative role, funding to financing (D) Country level studies</p>

	<ul style="list-style-type: none"> • Expanding the humanitarian response capacity • Tailoring programmatic and technical assistance to better respond to local contexts • Strengthening the UNFPA normative role • Funding the ICPD agenda to financing the ICPD agenda • Increasing the focus on joint accountability 	Do staff members have the appropriate capabilities and incentives?	(A) Desk reviews (B) KIIs: HR (C) Deep dives: normative role, funding to financing (D) Country level studies
		How efficient is the process of operationalising the shifts and partnerships	(A) Desk reviews (B) KIIs (C) Deep dives: normative role, funding to financing (D) Country level studies
		What is the level of integration and coherence across strategic shifts?	(A) Desk reviews (B) KIIs (C) Deep dives: normative role, funding to financing (D) Country level studies
		What is the level of integration and coherence with UN system wide approaches?	(A) Desk reviews (B) KIIs: RCO/RC, other UN entities (C) Deep dives: normative role, funding to financing (D) Country level studies
2.3 To what extent is each of the strategic shifts being implemented to enhance programming at regional and country-levels? What have been the enabling and inhibiting factors?	<ul style="list-style-type: none"> • Aligning the organizational focus on achieving the three transformative results • Integrating the effects of megatrends into programming • Scaling up the provision of high-quality comprehensive SRH information and services • Expanding the humanitarian response capacity • Tailoring programmatic and technical assistance to better respond to local contexts • Strengthening the UNFPA normative role 	Have the shifts been implemented at the regional and country level to enhance programming?	(A) Desk reviews including MTR (B) KIIs (C) Deep dives: normative role, funding to financing (D) Country level studies
		If not, why?	(A) Desk reviews including MTR (B) KIIs (C) Deep dives: normative role, funding to financing (D) Country level studies

	<ul style="list-style-type: none">• Funding the ICPD agenda to financing the ICPD agenda• Increasing the focus on joint accountability

EQ3: What are the enablers of SP implementation and to what extent have they facilitated the acceleration and strategic shifts for seen in the Strategic Plan?

Sub-questions	Areas of investigation	Main lines of inquiry	Sources/methods/tools
3.1 To what extent has strategic communication facilitated the acceleration and strategic shifts foreseen in the Strategic Plan?	All accelerators and strategic shifts	Have the strategic plan including its strategic shifts and accelerators been adequately communicated to staff, partners and other stakeholders?	(A) Desk reviews (B) KIIs: Comms (C) Deep dives (D) Country level studies
		Has strategic communication been used effectively for leveraging UNFPA's work in areas such as normative agenda or moving from funding to financing?	(A) Desk reviews (B) KIIs: Comms (C) Deep dives (D) Country level studies
3.2 To what extent has human resource strategies and management facilitated the acceleration and strategic shifts foreseen in the Strategic Plan?	All accelerators and strategic shifts	Are there adequate staff in place to operationalize the accelerators and shifts across all levels?	(A) Desk reviews (B) KIIs: HR (C) Deep dives (D) Country level studies
		Does the performance management system provide the right incentives?	(A) Desk reviews (B) KIIs: HR (C) Deep dives (D) Country level studies
		Are the onboarding and orientation process adequate and timely to ensure adequate understanding of the accelerators and shifts?	(A) Desk reviews (B) KIIs: HR (C) Deep dives (D) Country level studies
		Are relevant and effective ongoing learning opportunities about the SP provided?	(A) Desk reviews (B) KIIs: HR (C) Deep dives (D) Country level studies
3.3 To what extent has knowledge management facilitated the acceleration and strategic shifts foreseen in the Strategic Plan?	All accelerators and strategic shifts	Is there an appropriate strategy in place for KM?	(A) Desk reviews (B) KIIs: PSD (C) Deep dives (D) Country level studies
		Is relevant knowledge being generated and made easily accessible?	(A) Desk reviews (B) KIIs: PSD

			(C) Deep dives (D) Country level studies
		Is relevant tacit knowledge captured, shared and used?	(A) Desk reviews (B) KIIs: PSD (C) Deep dives (D) Country level studies
		Is KM operationalized in a coherent manner with SSTC, innovation and other related areas?	(A) Desk reviews (B) KIIs: PSD (C) Deep dives (D) Country level studies
3.4 To what extent has the business model facilitated the acceleration and strategic shifts foreseen in the Strategic Plan?	All accelerators and strategic shifts	Is the resource allocation system appropriate?	(A) Desk reviews (B) KIIs: PSD (C) Deep dives (D) Country level studies
		Are models of country presence appropriate?	(A) Desk reviews (B) KIIs: PSD (C) Deep dives (D) Country level studies
3.5 What other enablers can be identified and to what extent have they facilitated the acceleration and strategic shifts foreseen in the Strategic Plan?	All accelerators and strategic shifts	All	(A) Desk reviews (B) KIIs (C) Deep dives (D) Country level studies

EQ4: To what extent should UNFPA reconceptualize the next Strategic Plan given the state of progress towards the SDGs and 3TRs?

Sub-questions	Areas of investigation	Main lines of inquiry	Sources/methods/tools
4.1 To what extent are the goals and targets of the Strategic Plan 2022-2025 still achievable?	<ul style="list-style-type: none"> • 3TRs • SP goal targets • SP outcome targets 	How far from the end-of-SP quantitative targets are we?	(A) Desk reviews: Review of IRRF reporting in the annual report of the ED (B) KIIs: PSD, TD
		Has there been an acceleration/deceleration towards the targets over the period since the start of the SP?	(A) Desk reviews: Review and Analysis of IRRF reporting data (B) KIIs: PSD, TD
		How much acceleration is required to achieve these targets?	(A) Desk reviews: Review of UNFPA research into the extent of acceleration needed (B) KIIs: PSD, TD
4.2 To what extent does the strategy of the SP 2022-2025 to accelerate progress towards the 3TRs remain relevant?	<ul style="list-style-type: none"> • Country presence models • Resource allocation • Strategic Shifts 	Are the country presence models appropriate?	(A) Desk reviews: Review and Analysis of IRRF reporting data (B) KIIs: PSD, TD
		Are resource allocation systems appropriate?	(A) Desk reviews: Review and Analysis of IRRF reporting data (B) KIIs: PSD, TD
		What have we learned about the strategic shifts, including accelerators?	(A) Desk reviews: Review and Analysis of IRRF reporting data (B) KIIs: PSD, TD
4.3 To what extent is the logic of the series of three SPs leading up to 2030 still appropriate?	<ul style="list-style-type: none"> • The proposed focus of the new SP 2026-2029 • The external environment • The findings from EQs 1-3 	How far from the 2030 quantitative targets are we?	(A) Desk reviews: Review of IRRF reporting in the annual report of the ED (B) KIIs (C) Deep dives
		How much acceleration is required to achieve the 2030 targets?	(A) Desk reviews: Review of UNFPA research into the extent of acceleration needed (B) KIIs: PSD, TD

Annex 6: Documents Reviewed

This annex does not include regional level documents reviewed as they are included in the six regional programme evaluations conducted jointly with this evaluation . The standard list of documents collected for each of the 12 country studies is found in annex 6 on detailed methodology.

3.1 internal UNFPA Documents related to Strategic Planning

UNFPA Strategic Plan 2018-2021

UNFPA. *Strategic Plan, 2018-2021* (DP/FPA/2017/9). 2017

Annex 1: Integrated results and resources framework

Annex 2: Theory of change

Annex 3: Alignment with General Assembly resolution 71/243 of 21 December 2016

Annex 4: Business model

Annex 5: UNFPA programme accountability framework

Annex 6: Global and regional interventions

Annex 6.1: Regional interventions action plan for Asia and the Pacific, 2018-2021

Annex 6.2: Regional interventions action plan for Arab States, 2018-2021

Annex 6.3: Regional interventions action plan for Eastern Europe and Central Asia, 2018- 2021

Annex 6.4: Regional interventions action plan for East and Southern Africa, 2018-2021

Annex 6.5: Regional interventions action plan for Latin America and the Caribbean, 2018– 2021

Annex 6.6: Regional interventions action plan for West and Central Africa, 2018–2021

Annex 6.7: Global interventions action plan, 2018-2021

Annex 7: Working together to support implementation of the 2030 Agenda

MOPAN. *UNFPA 2017-18 Performance Assessment*. 2019

Annex 7: Leveraging ethical and responsible use of AI

A combination of human expertise from the UNFPA Independent Evaluation Office (IEO) and artificial intelligence (AI) was used to analyse whether the Country Programme Document (CPDs) had put various strategic shifts and accelerators into practice, and to determine if the current CPDs showed an increased focus on these strategic shifts and accelerators compared to the previous CPD.

The evaluation officers from IEO provided in-depth understanding, critical judgement, and contextual analysis, ensuring that the strategic elements were interpreted with a level of insight that AI alone cannot achieve. At the same time, AI helped by quickly processing large amounts of text, providing fast, consistent, and scalable analysis, thus complementing the human experts at IEO.

To ensure data privacy, all trained AI models and data were deleted once the project had finished. This ensured all data related to this project stays confidential and cannot be used or accessed by others. The reports analysed also did not contain sensitive personal information and were publicly available. Furthermore, to ensure transparency and explainability, the AI model provided explanations and verbatim quotes to support its assessments. This approach ensures that the decision-making process is clear and comprehensible to stakeholders, thereby enhancing trust in the analysis.

To ensure accuracy and reliability, direct oversight was provided by IEO human experts, who made ultimate decisions on data inclusion and interpretation. They defined key terms and continuously reviewed and refined the AI model's interpretations of these terms to ensure nuanced understanding necessary for accurate analysis. Multiple rounds of manual review were conducted to mitigate risks of hallucination and bias. Quotes from the AI models were also checked against the reports via an automated system, to prevent hallucination.

The analysis began with training 14 AI models using definitions of strategic shifts and accelerators from the IEO. Each model focused on a specific strategic shift or accelerator. Initially, the AI assessments were inaccurate because the concepts were complex and the provided definitions lacked clear, quantifiable criteria for determining whether a CPD had operationalized a strategic shift or accelerator. To address this issue, the IEO supplied additional training data, which comprised human assessments across ten CPDs for each strategic shift and accelerator. This helped the AI models infer the implicit criteria used by the IEO, allowing them to more accurately determine whether a CPD had effectively implemented a strategic shift or accelerator, despite the absence of an explicit framework for this.

To generate the analysis, the trained AI models were instructed to examine the current and previous CPDs to assess the implementation of the respective strategic shift or accelerator. This involved finding relevant quotes from each document and creating an analysis on whether the element was put into practice, along with determining any increase or decrease in effort from the previous to the current CPD. This analysis was done separately for each country and its specific strategic shift or accelerator, focusing on just the current and previous documents for that country at any one time. An automated check was also done to make sure all the quotes taken from the CPDs were accurate and not hallucinated. Other AI models were used to double-check the accuracy of the assessments made by the trained AI models.

The analysis process was highly iterative, with humans closely involved in every stage, providing oversight and guidance. In particular, as each iteration progressed, the IEO played a crucial role in providing even more precise definitions of accelerators and strategic shifts. This refinement was particularly important for complex concepts such as "strategic partnerships". Initially, strategic partnerships had a broad definition, encompassing reinvigorating and expanding partnerships with both new partners (e.g., private sector, academia) and traditional partners (e.g., civil society

organizations, government organizations). Consequently, as long as a CPD mentioned partnerships, even if briefly, the AI model assessed that it had adopted the strategic partnerships accelerator. At times, potential differences of interpretation were discussed by the humans as well at different stages, and for various concepts. This dialogue further ensured that the human and AI team assessed the shifts and accelerators in a uniform manner.

Further, given that CPDs were very brief and hence often mentioned strategic shifts or accelerators only in passing, without providing detailed context or explanations, it left considerable room for interpretation, leading to the identification of numerous subjective edge cases that required careful examination and deliberation to ensure consistency and accuracy in the analysis. In addition, the AI analysis's focus on 14 multi-faceted accelerators and shifts, encompassing over 30 sub-variable components, added a layer of complexity to the exercise. Through this iterative process of refinement and collaboration between human experts and AI in the sample analysis stage, given that the accuracy level was sufficiently high, a decision was taken to scale up the model to the remaining 65 CPDs.

After reviewing the final analysis provided by AILYZE, the evaluation team identified the following key limitations in the AI-generated analysis:

- The accuracy of the analysis varies across sub variables. While the AI generated analysis effectively captures the operationalization and changes in some sub-variables, it struggles with more nuanced definitions. For example, while climate change or urbanisation are relatively straightforward, aspects like UNFPA's normative role or shifting from funding to 'funding and financing' were not as easily captured.
- As the AI relies on language modelling, it has difficulty capturing nuances of how accelerators and shifts are portrayed in the CPDs.
- Some errors in the analysis, such as sub-variables being swapped within the same category or the current CPD being used for analysing the previous CPD, were also identified.

Overall, while AI models can offer more definitive analyses when definitions, criteria, and frameworks are clearly defined, in this exercise, the AI-generated assessments served primarily as a starting point, especially for the more abstract variables analysed. Given the complexity and variability in assessing strategic shifts and accelerators, the AI's role was to process large volumes of data and identify general trends across countries. These initial insights were then refined and validated through human expertise and interpretation, underscoring the complementary nature of AI and human analysis in handling nuanced evaluations.

Lessons learned from the IEO/evaluation team perspective:

- The conceptual framework should provide clear, detailed definitions for all 'variables' and 'sub-variables' at the outset
- Ensure human review and validation in every round of the AI analysis
- Plan for the time that will be needed to receive, review, analyse and validate various rounds of analysis
- Clarify the degree of confidence in the AI-generated analysis and need for further triangulation
- Consider using the analysis to identify patterns across different country contexts
- Provide a clear reference in the evaluation report to the use of the AI-generated analysis
- Explain the use of AI clearly in the methodology, including how ethical standards were adhered to.

Annex 8: Interviews

A. UNFPA HQ STAKEHOLDERS

Branch/Unit	Title
Policy and Strategy Division ²⁹	
Policy and Strategy Division (PSD)	Director
Policy and Strategic Information and Planning Branch, PSD	Chief
	RBM Advisor
	Strategic Planning and KM Advisor
Operational Support and Quality Assurance Branch (OSQAB), PSD	Global Programme Coordinator
	Programme Specialist
Intergovernmental Interagency and Policy Dialogue Branch	Inter-Agency Affairs Coordinator
ICPD30 Secretariat	Senior Adviser
Technical Division ²⁹	
Population and Development Branch, Technical Division (TD)	Chief
Family Planning Branch, Technical Division	Chief
Commodity Security Branch	Technical Advisor
Gender and Human Rights Branch	Technical Advisor on Gender
Population and Development Branch	Technical Specialist, Census and Demographic Data
Population and Development Branch	Technical Specialist, SDG Data and Research
Gender and Human Rights Branch	Human Rights Technical Advisor
Population and Development Branch	Senior Technical Adviser
Population and Development Branch	Senior Adviser, Economics and Demography
Programme Division ²⁹	
	Director
	Deputy-director
Communication and Strategic Partnerships Division	
Communication and Strategic Partnerships Division	Director
Strategic Partnerships Branch	Chief
Strategic Partnerships Branch	Strategic Partnerships Specialist
Strategic Partnerships Branch	Strategic Partnerships Specialist/Individual Giving Programme Manager
Media and Communications Branch	Chief
Resource Mobilization Branch	Chief
Human Resources Division	
Human Resources Division	Director
Humanitarian Response Division	
Humanitarian Response Division	Director
Humanitarian Response Division	Programme Advisor
Programme Support Unit	Global Humanitarian SRH Adviser (acting Head, PSU)

²⁹ From 1 August 2024 after the completion of data collection, the Policy and Strategy Division and Technical Division became the Programme Division.

Management Services Division	
Strategic Resource Planning Branch	Chief
Office of the Executive Director	
Office of the Executive Director	Deputy Executive Director, Programme
Office of the Executive Director	Deputy Executive Director, Management
Office of the Executive Director	Chief of Staff
Innovation Unit	Head
Evaluation Office	
Evaluation Office	Director

B. REGIONAL STAKEHOLDERS

Division/Unit	Title
Asia and the Pacific	
APRO	Regional Director
APRO	Deputy Regional Director
APRO	RMEA
Arab States	
ASRO	Regional Director
ASRO	RMEA
Eastern Europe and Central Asia (inception mission)	
EECARO	Regional Director
EECARO	Deputy Regional Director
EECARO	Gender Adviser
EECARO	RMEA
EECARO	Programme Specialist, Youth
EECARO/Population and Development Branch, TD	Senior Adviser, Economics and Demography
EECARO	Population and Development Adviser
EECARO	Regional Adviser, Gender
EECARO	SRH, Regional Adviser
EECARO	Regional Communications Advisor
EECARO	Humanitarian Response Specialist
EECARO	RM and Partnership Advisor
EECARO	International Operations Manager
Academic Network for Sexual and Reproductive Health and Rights Policy (ANSER), Ghanet University	Coordinator
Eastern and Southern Africa	
	Regional Director
ESARO	Deputy Regional Director
ESARO	RMEA
Latin America and the Caribbean	
LACRO	Regional Director
LACRO	Deputy Regional Director
LACRO	RMEA

West and Central Africa	
WCARO	Deputy Regional Director
WCARO	RMEA

C. COUNTRY STUDIES

Division/Unit	Title
Botswana	
UNFPA Botswana CO	Head of office
UNFPA Botswana CO	Programme Specialist – Youth and Gender
UNFPA Botswana CO	Consultant – Disability/Youth
UNFPA Botswana CO	Resource Mobilization and Communications Analyst
UNFPA Botswana CO	SRH/HIV Linkages coordinator
UNFPA Botswana CO	Strategic Information Specialist
UNFPA Botswana CO	Operations Manager
Ministry of Education	Director, Department of Learner Support Services
Ministry of Health	Deputy Permanent Secretary
Statistics Botswana	Deputy National Census Coordinator
Ministry of Labour and Home Affairs	Department of Civil and National Registration
National Planning Commission (under Office of the President)	Population and Development Unit
Botswana Council for Non-Governmental Organizations [BOCONGO]	Executive Director
University of Botswana	Senior lecturer and Head of the Department of Population Studies
RCO	Resident Coordinator
RCO	Head of Office a.i.
RCO	Economist
UNICEF	Representative
Bolivia	
UNFPA Bolivia CO	Representative
UNFPA Bolivia CO	Assistant Representative
UNFPA Bolivia CO	Responsible for Data and Knowledge Management
UNFPA Bolivia CO	Departmental Responsible in SSR Chuquisaca/Potosi
UNFPA Bolivia CO	Responsible for Maternal Health
UNFPA Bolivia CO	Responsible in Active Citizenship and Harmful Practices
UNFPA Bolivia CO	Quality of Care & Services Programme Analyst
UNFPA Bolivia CO	Responsible for Integral Sexual Education
UNFPA Bolivia CO	Project Officer Cochabamba
UNFPA Bolivia CO	Social and Gender Norms Programme Analyst
UNFPA Bolivia CO	Consultant for Strengthening Programme Supplies Logistics Chain
UNFPA Bolivia CO	Communication and Advocacy Programme Analyst

UNFPA Bolivia CO	Project Officer Chuquisaca and Potosí
UNFPA Bolivia CO	Project Administrator KOICA funds
UNFPA Bolivia CO	M&E Programme Analyst
UNFPA Bolivia CO	Programme & Management Assistant
UNFPA Bolivia CO	Admin/Finance Associate
UNFPA Bolivia CO	Responsible SRH, RHCS & Youth Health
UN Resident Coordinator Office Bolivia	Head of Office
UN Resident Coordinator Office Bolivia	Coordination Officer
PAHO Bolivia	National Consultant - Life Course
PAHO Bolivia	Advisor - Family, Health Promotion and Life Course
PAHO Bolivia	National Consultant - Data systems and Maternal Mortality
UN Women Bolivia	Project Manager
UN Women Bolivia	National Specialist -UNV Legal Technical Assistant
UN Women Bolivia	Natioanl Specialist
UNICEF Bolivia	Chief of Social Policy
UNICEF Bolivia	Chief of Child Survival and Development
UNICEF Bolivia	Advocacy and Policy officer
Ministerio de Salud y Deportes	Director General of Health Services
Ministry of Education. Specialized unit for continuous training (UNEFCO)	Coordinator
Ministry of Education. Specialized unit for continuous training (UNEFCO)	Coordinator
Observatorio de la Calidad Educativa	Director
KOICA Bolivia	Deputy Director
KOICA Bolivia	Health Expert
KOICA Bolivia	Intern
Ministry of foreign Affairs Sweden	Programme Officer Human Rights, Gender and social sectors.
CIES Salud Sexual Salud Reproductiva	Project Coordinator
CIES Salud Sexual Salud Reproductiva	National Program Manager
Marie Stopes	Country Director
Medicos del Mundo	Project coordinator
Medicos del Mundo	Country Coordinator

Fiscalia General del Estado / Ministério Publico	Director of the Specialized Prosecutor's Office for Gender-Related Crimes and Juvenile Justice
Fiscalia General del Estado / Ministério Publico	Director of the School of State Prosecutors
Center for Population Studies - Universidad Mayor de San Andrés	Director
Observatório de Población y Desarrollo	Coordinator
Universidad Mayor de San Andrés	Director Director del Instituto de Investigaciones Sociologicas
Universidad Mayor de San Andrés	Observatorio de Políticas Públicas y Sociales de la carrera de Trabajo Social
Universidad Mayor de San Andrés	Professor
Universidad San Simon	Coordinator of the Population and Development Observatory and Research Professor at the Center for Population Studies at Saint Simon University.
Chad (Desk Review)	
UNFPA Chad CO	Country Representative
UNFPA Chad CO	Deputy Representative
UNFPA Chad CO	Assistant Representative/ Population and Data
UNFPA Chad CO	Humanitarian Coordinator
UNFPA Chad CO	Reproductive Health Technical Specialist
UNFPA Chad CO	RHCS Technical Specialist
UNFPA Chad CO	Youth Programme Specialist
UNFPA Chad CO	Family Planning Programme Officer
UNFPA Chad CO	GBC Coordinator
UNFPA Chad CO	International Operations Manager
UNICEF Chad CO	Country Representative
